

GKBook

Colors That Start With K

A researched encyclopedia of names, digital values, historical meanings, and independently reviewed shade families

323 digital records	41 historical headwords	12 shade families
Source-linked RGB and hex	Documented source meanings	Independent visual review

An illustrated reference for high school and college readers, with an alphabetical directory, worked comparisons, documented historical terms, and a complete companion swatch atlas.

Research checked: October 14, 2026
Language: US English
Scope: International, source-bounded coverage; no worldwide completeness claim.

Overview

From khaki to Kryptonite

Colors that start with K include everyday words such as khaki, survey names such as kiwi green, institutional identity colors such as Kansas Blue, and hundreds of named commercial previews. The same word can identify different colors in different systems. This encyclopedia keeps those systems visible instead of presenting a single unsourced list.

What this edition contains

The digital directory contains **323 source-specific records**, representing **277 distinct displayed names** and **322 distinct RGB triplets**. Each record has a cited name, an exact hexadecimal value, decimal RGB, and one of GKBook’s 12 visually reviewed shade families. The separate historical directory contains **41 lexical headwords** documented in the NBS color-name dictionary. These counts overlap in vocabulary and must not be added together as a count of unique colors.

How to use it

Start with the alphabetical directory to find a name, or use the companion atlas to browse by family. Copy the **name, source, code, and hex value together** when citing a digital record. Use the evidence note to distinguish a primary issuer preview from a dealer approximation, supplier preview, survey label, or older manufacturer table. Material and historical entries without reliable digital specifications remain descriptive.

Scope

This is a broad, source-bounded reference checked on October 14, 2026. It is not a claim to enumerate every K color in every language, period, product line, or market. Published availability, labels, and numerical previews can change. The editorial notes document both coverage and unresolved evidence.

At a glance

Measure	This edition
Admitted digital records	323: 295 primary-issuer, 16 dealer, 2 supplier, 8 survey, 2 historical-table
Distinct displayed names / RGB triplets	277 names / 322 triplets
Source groups	21 evidence groups; the two SW tables are separated
Historical headwords	41; no digital values invented
Held conflicting records	15: one Resene and 14 Pantone TPG dealer rows
Alias consolidation	One same-code Gray/Grey spelling pair

A color name needs a source

Names are identifiers within a context

A color name works like a place name: it becomes precise only when its context is known. “Khaki” in CSS, a textile dealer’s Pantone table, and a Dulux product page does not identify one shared RGB value. Figure 1 compares four records without declaring any of them the universal khaki. [9, 12, 13, 17]

Why repeated names stay separate

The unit of the directory is a source-specific record, not an isolated word. Two sources may use the same spelling with different numbers; they receive separate records. Conversely, CSS khaki and X.Org khaki use the same numbers but remain distinct evidence contexts. Equal RGB values establish equal encoded previews in the assumed color space, not identical paints, dyes, or commercial products. [17–19]

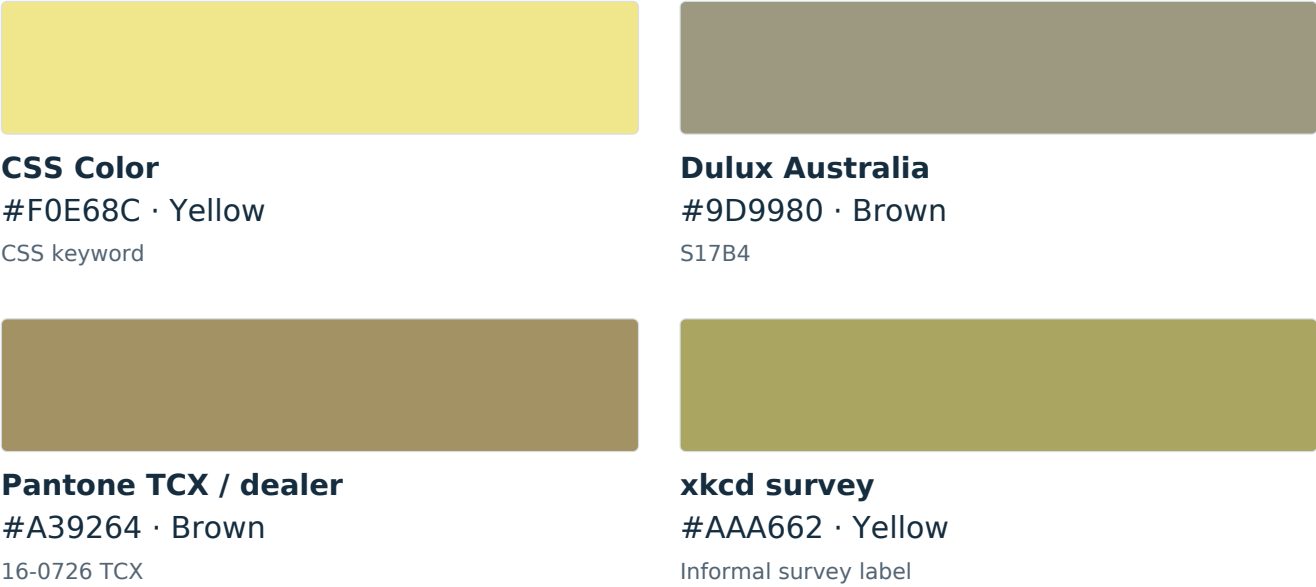

When an alias can be combined

Nerolac’s Knight Gray and Knight Grey share the explicit code 4539 and the same hex value, #B0A89E. They are combined into one retained record, with both page URLs preserved. The xkcd labels “kelley green” and “kelly green” have different numerical values, so both stay in the directory. Similar spelling alone is not a basis for merging. [11, 13]

GKBOOK / K-COLORS / FIGURE 1

One name, four documented previews

Khaki across different systems • Source identity matters

Original GKBook graphic • Research checked October 14, 2026

Figure 1. One name, four documented previews Khaki has different values in different systems. These records remain separate; the TCX row is explicitly a dealer approximation.

Reading RGB and hexadecimal values

Two notations for the same encoded channels

The six-digit form #RRGGBB contains two hexadecimal digits per channel. Each pair is a base-16 number between 00 and FF, equivalent to a decimal value between 0 and 255. CSS khaki is #F0E68C: F0 = 240, E6 = 230, and 8C = 140. Changing notation does not change the color. [17]

State the color space

RGB describes three channels, but the numbers need an encoding context. The supplied illustrations interpret the published eight-bit values as **sRGB**, the standard color space identified by the ICC registry and used by CSS hexadecimal colors. A manufacturer’s web preview remains a web preview even when its RGB fields are precise. [17, 19]

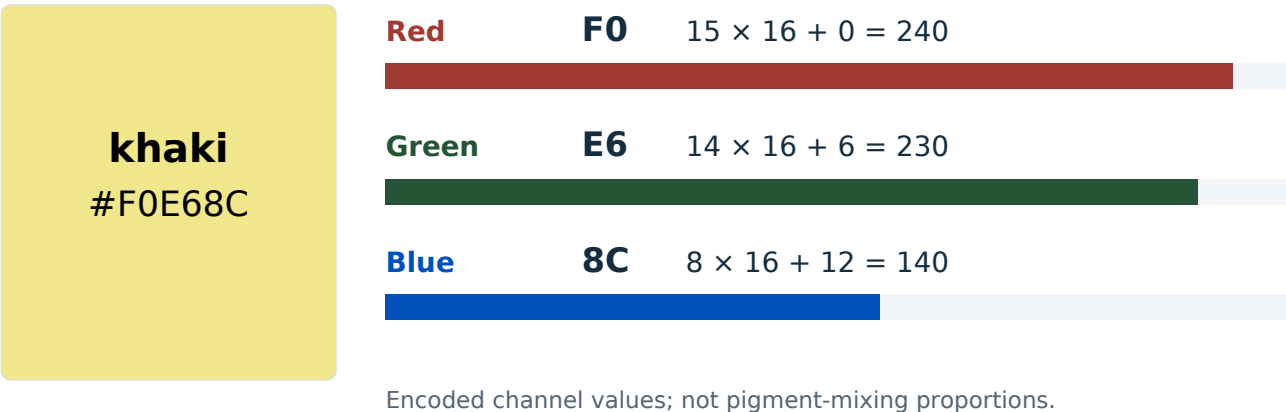

A screen recipe is not a paint recipe

The channel values are encoded signal levels. They do not mean 240 parts red pigment, 230 parts green pigment, and 140 parts blue pigment. A digital patch does not reproduce a material’s texture, gloss, metallic effects, substrate, or response to different illumination. For a physical specification, consult the relevant current physical reference and product system. [19, 33]

GKBOOK / K-COLORS / FIGURE 2

Reading #F0E68C

CSS khaki • RGB (240, 230, 140)

Original GKBook graphic • Research checked October 14, 2026

Figure 2. Reading #F0E68C Hex and decimal RGB are exact alternative notations. sRGB is the interpretation used for the supplied illustrations.

How GKBook assigns shade families

Independent editorial judgment

Each admitted swatch was reviewed visually at its exact published RGB value. A preliminary numerical hue grouping helped organize the work, but it did not determine the final result. All 323 records were reviewed, and 63 provisional family assignments were revised. The decision log preserves the original and final labels.

Broad categories have boundaries

The 12 families are navigation aids. Brown includes many tans and beiges; Gray includes subdued undertones; White includes selected very pale tints. Blue and Green share the teal boundary. Purple and Violet are separated here by relatively redder versus bluer purple appearance, without claiming a universal scientific boundary. A family label never changes the cited numerical value.

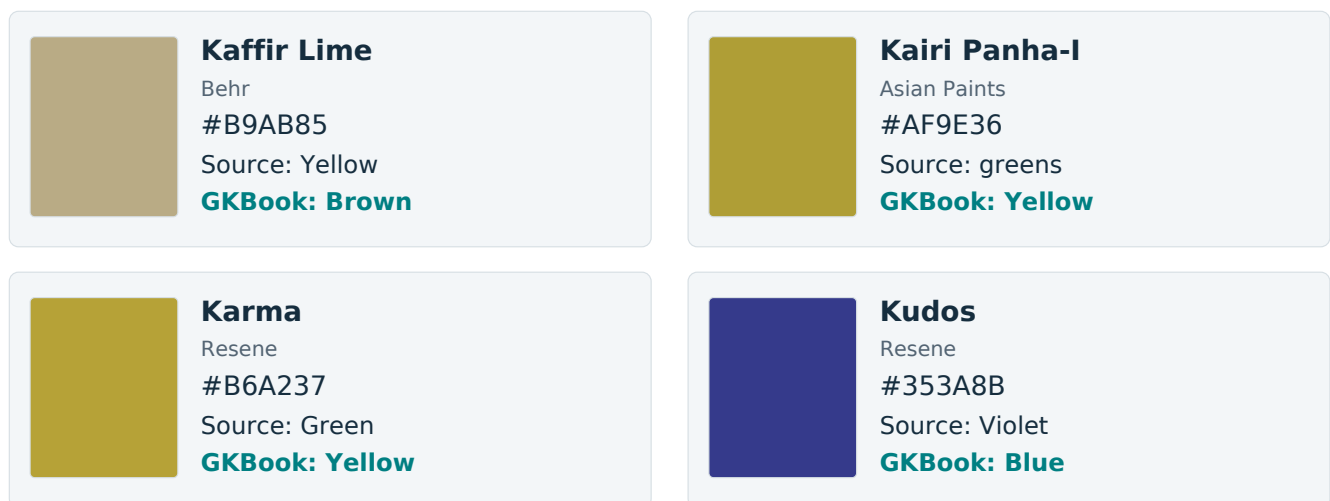

Names and manufacturer categories are preserved

Kitchen Green reads as a muted yellow-green and is placed in Green. K-State purple is placed in Violet because of its blue-leaning purple appearance. Other differences are shown in Figure 3. Source categories remain available as source metadata; they can be broader, commercially organized, or simply different from GKBook's visual judgment. [10, 16]

GKBOOK / K-COLORS / FIGURE 3

Source category and editorial family

Independent visual judgments • The source values stay unchanged

Original GKBook graphic • Research checked October 14, 2026

Figure 3. Source category and editorial family GKBook's final family is a visual editorial judgment. The original source category remains separate metadata.

Khaki: history, ordinary language, and code

A word with a wider range than one swatch

In ordinary English, khaki spans yellowish-brown and greenish-brown descriptions. The National Army Museum connects its uniform history with nineteenth-century British Indian military use and Persian-derived earth or dust terminology. That history explains the word’s associations without making every garment or paint called khaki the same shade. [23, 24]

The historical dictionary keeps different assignments

The NBS dictionary assigns Maerz and Paul’s khaki to light and moderate yellowish brown, while the textile-card source falls under light olive brown. These are descriptive categories attached to documented sources, not modern RGB specifications. The dictionary evidence is therefore retained in the historical directory without an invented swatch. [22]

CSS gives the keyword a precise digital meaning

CSS khaki is #F0E68C, a comparatively light yellow in GKBook’s scheme. X.Org’s unnumbered khaki matches it, while khaki1 through khaki4 are distinct X11 entries. Those numbered forms are not CSS named-color keywords. A web author can reproduce a numbered variant with its hex value rather than treating the X11 label as a CSS keyword. [17, 18]

How to cite a khaki color

“Khaki #F0E68C (CSS)” and “Khaki #A39264 (Columbia Omni Studio TCX preview)” describe different evidence. The latter remains a dealer approximation, not a verified current licensed Pantone value. For a textile or coating order, the material system and current physical reference matter more than a familiar name. [12, 33]

Record / name	Source	Hex	Family
K0138 / khaki	CSS Color	#F0E68C	Yellow
K0139 / Khaki	Dulux Australia	#9D9980	Brown
K0140 / Khaki	Pantone TCX / dealer	#A39264	Brown
K0141 / khaki	X.Org X11	#F0E68C	Yellow
K0142 / khaki	xkcd survey	#AAA662	Yellow

Kelly, kiwi, and kingfisher: useful comparisons

Kelly Green and its spellings

The historical Kelly Green entry covers strong yellowish green, deep yellowish green, and strong green in the Taylor-Knoche-Granville source. Modern records include a Benjamin Moore preview, a Pantone TCX dealer preview, and two differently spelled xkcd labels. These are related pieces of vocabulary, not evidence of one exact cross-system standard. [\[2, 12, 13, 22\]](#)

Kiwi can describe very different previews

Most admitted records called Kiwi are green or yellow-green, but Resene Kiwi is #6B5A4F, an earthy Brown. The entry does not establish which aspect of a kiwi inspired the name. A plausible story about fruit flesh, skin, or a bird should not be presented as the maker's documented naming history. [\[2, 3, 5, 11-13\]](#)

Kingfisher is not automatically Kingfisher Blue

The historical dictionary assigns Kingfisher to dark blue and Kingfisher Blue to strong greenish blue. Current named previews also vary: Behr Kingfisher, Resene Kingfisher Blue, and RAL Kingfisher blue have distinct numerical values. The noun supplies an association; the cited source supplies the specification. [\[1, 5, 14, 22\]](#)

A comparison table is not a matching service

The examples below demonstrate source differences. Adjacency in this table does not establish a measured match, a substitute product, or equivalent performance. Record IDs lead back to the complete evidence notes.

Record / name	Source	Hex	Family
K0079 / Kelly Green	Benjamin Moore	#00A162	Green
K0080 / Kelly Green	Pantone TCX / dealer	#339C5E	Green
K0078 / kelley green	xkcd survey	#009337	Green
K0081 / kelly green	xkcd survey	#02AB2E	Green
K0234 / Kiwi	Nerolac	#BDCF87	Green
K0236 / Kiwi	Resene	#6B5A4F	Brown
K0199 / Kingfisher	Behr	#3A5760	Blue
K0201 / Kingfisher Blue	Resene	#596A8B	Blue

Materials and art: names without one universal hex

Klein blue and International Klein Blue

International Klein Blue belongs to Yves Klein's artistic and material practice. The Yves Klein archive documents a Soleau envelope dated May 19, 1960, concerning the fixative medium. The Centre Pompidou describes ultramarine pigment, a Rhodopas M resin binder, and work with color merchant Édouard Adam. These sources document a physical color-making practice, not a universal RGB code. A photographed artwork or a website's chosen blue is a reproduction of a particular image or design. [25, 26]

Kunzite

Kunzite is a pink to violetish-purple variety of spodumene named for George Frederick Kunz. GIA notes that its appearance varies with viewing direction. The material name therefore describes a range of specimens and appearances; a single web hex would be an illustrative choice rather than a gemological standard. No universal Kunzite swatch is assigned here. [27]

Kyanite

Kyanite is Al_2SiO_5 . The Handbook of Mineralogy records blue and white colors along with rarer green, gray, yellow, pink, and black appearances, sometimes with zoning. Its blue-associated name does not limit every specimen to one blue. The mineral is discussed descriptively instead of being reduced to an unsupported RGB value. [28]

Kermes

Kermes is a natural red dye associated with female Kermes insects and kermesic acid, and it also appears in historical red lake pigments. The NBS headword maps to vivid red, but the category does not specify a particular modern digital patch. Dye preparation, substrate, and the condition of an object remain distinct from the historical color name. [22, 29]

King's Yellow

King's Yellow is a historical pigment name associated with synthetic orpiment, arsenic trisulfide. CAMEO also records an alternative historical usage involving lead chromate. The name alone cannot establish a sample's chemical identity. In the NBS dictionary it is grouped with several yellow categories through Lemon [Yellow]; these lexical categories should not be mistaken for a chemical formula or RGB standard. [22, 30, 31]

Digital standards, surveys, and identity colors

CSS and X11 have explicit but different inventories

The consulted CSS Color 4 named-color table contains one K-initial keyword: khaki. Its current publication is a Candidate Recommendation Draft. The official X.Org rgb 1.1.1 file has five K entries: khaki and four numbered variants. A value’s presence in X11 does not automatically make its label a CSS named keyword. Names such as darkkhaki are outside this page’s K-initial rule. [\[17, 18\]](#)

Survey labels describe collected naming behavior

The xkcd data contributes eight K labels. Its values were estimated from a naming survey and reflect that dataset’s methodology and display conditions. They are useful documented screen-color names, but they do not become universal language categories, physical standards, or guarantees of agreement between viewers. Original spellings are retained. [\[13, 32\]](#)

Identity colors must keep their institution

Kansas Blue is #0051BA in the University of Kansas guidelines; K-State purple is #512888 in Kansas State University’s current guidelines. The institution is part of the identification. The directory does not rename every color in those palettes with a K prefix to inflate its scope. Published identity colors are cited here as factual references, not as permission to use an institution’s marks. [\[15, 16\]](#)

Record / name	Source	Hex	Family
K0001 / K-State purple	Kansas State University	#512888	Violet
K0042 / Kansas Blue	University of Kansas	#0051BA	Blue
K0138 / khaki	CSS Color	#F0E68C	Yellow
K0141 / khaki	X.Org X11	#F0E68C	Yellow
K0150 / khaki1	X.Org X11	#FFF68F	Yellow
K0151 / khaki2	X.Org X11	#EEE685	Yellow
K0152 / khaki3	X.Org X11	#CDC673	Yellow
K0153 / khaki4	X.Org X11	#8B864E	Brown

Readable color: a worked contrast example

Test the foreground and background together

A color is not accessible or inaccessible by itself. Text contrast depends on the foreground, background, and intended text size. For opaque sRGB colors, WCAG derives relative luminance from linearized channels and compares the lighter and darker values. Hue names and raw averages of the three RGB numbers are insufficient. [20]

Calculate before rounding

Normalize each eight-bit channel to c between 0 and 1. Use $c/12.92$ when c is at most 0.04045; otherwise use $((c + 0.055)/1.055)^{2.4}$. Then $Y = 0.2126R + 0.7152G + 0.0722B$ for the linearized channels. Contrast is $(Y_{\text{lighter}} + 0.05)/(Y_{\text{darker}} + 0.05)$. The supplied data contains calculated black- and white-text ratios for each record. [20]

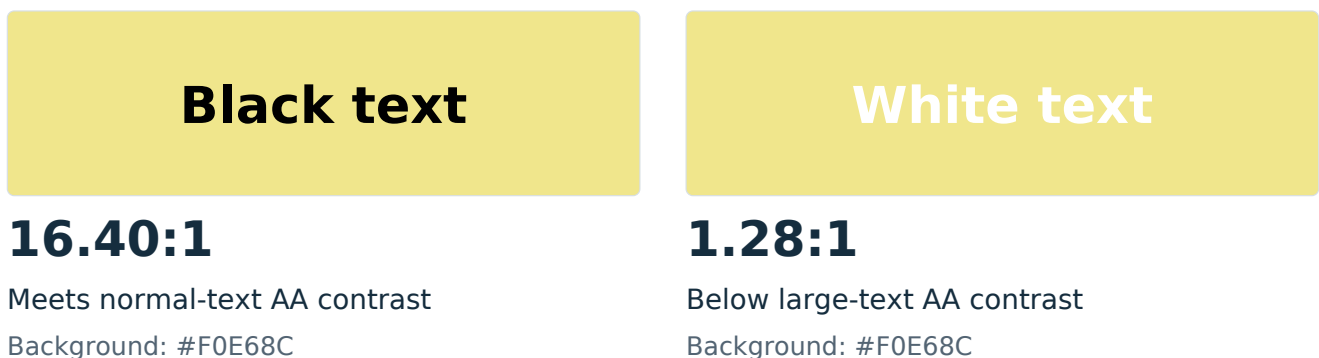

Interpret the result narrowly

AA text contrast requires at least 4.5:1 for normal text and 3:1 for large text. Large text is at least 18 points, or 14 points when bold. Use the unrounded result at the threshold. The figure intentionally includes one low-contrast example. Passing this calculation alone does not establish accessibility of a whole document, page, or interface. [21]

GKBOOK / K-COLORS / FIGURE 4

Text contrast on khaki

Opaque sRGB colors • Relative luminance $Y \approx 0.770123$

AA: at least 4.5:1 for normal text; 3:1 for large text.

The low-contrast white text is intentional. Compare unrounded ratios at a threshold.

Original GKBook graphic • Research checked October 14, 2026

Figure 4. Text contrast on khaki The same background supports one text color and fails another. Ratios follow WCAG 2.2; this calculation does not certify an entire interface.

Using this reference in study and design

For research and writing

Cite the source and code alongside the name. For historical vocabulary, include the NBS source key and category number, and make clear that the older source was consulted through NBS. For an art material or mineral, describe the documented range instead of borrowing a hex from an unrelated list.

For screen design

Use the exact hex value when the intended reference is a digital preview. Test text and essential graphics against their actual backgrounds. Keep labels, patterns, or other redundant cues so readers do not have to distinguish colors alone. The atlas gives every swatch an ID and text label; its family grouping is a browsing aid.

For physical materials

Treat screen previews as an initial orientation. A physical match requires the appropriate current reference, material, finish, and viewing conditions. This edition does not calculate universal CMYK conversions, paint-mixing proportions, pigment formulas, spectral reflectance, or nearest-brand equivalents from RGB alone. [33]

For editors

The bundle includes semantic HTML, plain text, clean JSON and CSV data, the family-review log, source URLs, unresolved rows, publication metadata, and original SVG/PNG figures. The supplied HTML is an offline editorial deliverable. Recheck source-specific records before a later release and preserve qualifiers when shortening the copy.

A useful comparison exercise

Choose two records with the same displayed name. Describe the numerical difference, compare their GKBook families, and identify the evidence type. Then ask what remains unknown about the corresponding physical objects. The exercise separates a verified fact from an interpretation and from a question the sources cannot settle.

Source coverage and family guide

The 21 source groups describe evidence contexts, not 21 unrelated manufacturers. Sherwin-Williams' two table contexts are separated, as are TCX and TPG dealer previews and the two institutional palettes. Counts reflect admitted records after one alias consolidation. Every source-specific record is counted once.

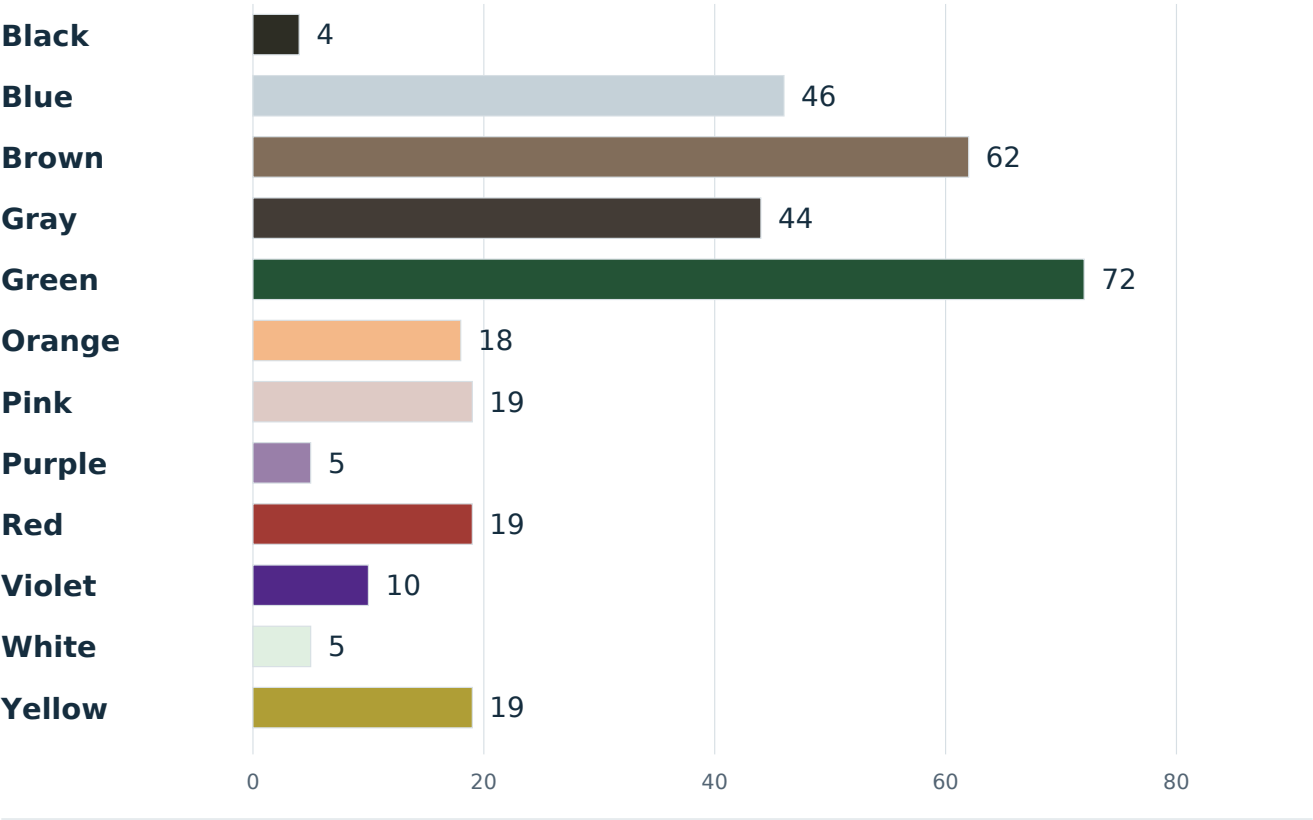

Source group	Count	Consulted evidence
Dulux Australia	64	64 primary pages; full-strength Kinder unresolved. [9]
Resene	56	K index and individual previews; Kabul excluded. [5]
Behr	31	Primary inventory; 24 of 31 individual pages also checked. [1]
Benjamin Moore	31	Primary family inventory; individual pages not recovered. [2]
Nerolac	22	23 primary pages; one same-code spelling pair combined. [11]
PPG	19	Targeted primary pages; incomplete catalog coverage. [6]
Sherwin-Williams	19	Newer primary RGB table; four individual pages also checked. [3]
RAL	17	17 English names; official CSS digital approximations. [14]
Asian Paints	16	Primary Decorpro inventory and named CSS fields. [8]
Pantone TCX / dealer	15	15 dealer previews; licensed values not verified. [12]
Dunn-Edwards	9	2025 CAD color books and individual primary pages. [4]
xkcd survey	8	Eight informal labels in the published dataset. [13]
X.Org X11	5	Five K entries in official rgb 1.1.1. [18]
COLORSTEEL® via Resene	2	Qualified supplier previews; current maker standard unverified. [5]
Farrow & Ball	2	Primary color-scheme base-swatch fields. [7]
Sherwin-Williams historical table	2	Older table only; current numerical values unverified. [35]
CSS Color	1	One K-initial named keyword: khaki. [17]
Kansas State University	1	Current official digital identity palette. [16]
Little Greene	1	Primary sample inventory and product hex field. [10]
Pantone TPG / dealer	1	Koi only; 14 conflicting dealer rows held. [12]
University of Kansas	1	Current official digital identity palette. [15]

Distribution in this edition

GKBOOK / K-COLORS / FIGURE 5

The 12 editorial families

Records in this source-bounded edition • n = 323

Each admitted record is counted once. • Counts do not measure popularity or natural abundance.

Figure 5. The 12 editorial families The distribution reflects consulted catalogs, record boundaries, and GKBook’s final visual judgments. It is not a survey of color popularity.

A large Green or Brown group tells us about the consulted inventories and editorial boundaries. It is not evidence that these colors are objectively more common, more popular, or more important. PPG coverage is targeted, and Jotun numerical coverage is incomplete. The editorial notes make those limitations explicit.

The family guide

Family	n	Interpretation / atlas figure
Black	4	Very dark near-neutrals, including selected tinted blacks. Figure 6.
Blue	46	Blues, blue-grays, cyan blues, and selected blue teals. Figure 7.
Brown	62	Earthy warm colors, tans, beiges, ochres, and selected taupes. Figure 8.
Gray	44	Near-neutrals with subdued warm, cool, green, or violet undertones. Figure 9.
Green	72	Greens, mints, olives, yellow-greens, and selected green teals. Figure 10.
Orange	18	Oranges, peach colors, salmon-oranges, and selected warm ambers. Figure 11.
Pink	19	Pinks, blushes, roses, and selected coral or deep rose colors. Figure 12.
Purple	5	Comparatively red-leaning or balanced purples, mauves, and plums. Figure 13.
Red	19	Reds, crimsons, burgundies, and selected brick colors. Figure 14.
Violet	10	Comparatively blue-leaning purples and selected lavenders. Figure 15.
White	5	Very pale near-neutrals and selected tinted whites. Figure 16.
Yellow	19	Yellows, creams, golden colors, and selected yellow chartreuses. Figure 17.

Figures 6–17 are delivered as 18 labeled SVG/PNG sheets and in the companion atlas PDF. Every one of the 323 digital records appears exactly once in those atlas sheets. Pale patches retain borders and all patches have text identifiers.

Alphabetical digital directory

The family is GKBook’s visual judgment. RGB and hex are exact equivalent notations for each admitted digital preview. Source categories, LRVs, archive flags, and evidence types retain their distinct meanings. The source label links to the individual record; a separate catalog link is shown when the numerical verification came from the catalog.

Evidence type	What it establishes
Primary issuer — 295	Published name, code where given, and digital preview in a primary source.
Dealer approximation — 16	Internally consistent dealer numbers; current licensed Pantone values unverified.
Supplier preview — 2	Resene-hosted COLORSTEEL previews; current maker standard unverified.
Survey label — 8	A published xkcd label and value, not a physical material standard.
Historical issuer table — 2	A value in an older SW table; a current numerical specification was not established.

Aliases and source versions

Alternative spelling	Retained record	Evidence
Knight Grey	Knight Gray / K0253	Nerolac 4539; identical published hex and RGB

The alias record preserves both consulted Nerolac URLs. This combines one digital naming record; it does not independently establish the physical history or availability of any product. [\[11\]](#)

Older tables require explicit labels

The general Sherwin-Williams table and a checked current Kilim Beige page agree on #D7C5AE, RGB 215, 197, 174. The older table gives #D7C9B0, RGB 215, 201, 176. This edition uses the general-table/current-page preview. The difference is not evidence by itself of a pigment reformulation. [\[3, 35\]](#)

Two historical-table previews

Kid’s Stuff SW 6893 (#F08A27) and Kumquat SW 6648 (#E9A05E) are retained from the older manufacturer table because their current numerical specifications were not established. Their source labels and evidence type explicitly say historical table. They are not counted among the 295 primary-issuer records verified through the other consulted contexts. [\[35\]](#)

Spelling, language, and modifiers

The main prose uses US English, but proper source names retain their spelling: gray/grey, Kelley/Kelly, and published suffixes such as -I and -N are not normalized into invented names. RAL English K names are the selection basis; German names are retained as aliases. Dulux Half and Quarter names have their own cited values, not values computed by averaging a base color with white.

Historical K-color names

The 41 headwords below come from the scanned K block on printed page 121 (PDF page 157) of Kelly and Judd’s 1976 NBS Special Publication 440. NBS translated earlier sources into ISCC–NBS descriptive categories. The source keys keep those contexts visible. The earlier books were consulted through NBS, not presented as separately examined originals. [22]

Key	Source interpreted by NBS
M	Maerz and Paul, A Dictionary of Color, first edition.
P	Plochere Color System.
R	Ridgway, Color Standards and Color Nomenclature.
T	Taylor, Knoche, and Granville, Descriptive Color Names Dictionary.
TC	Textile Color Card Association of the United States, standard color-card source.

A category number identifies a descriptive region, not an RGB triplet. Multiple numbers can reflect a range, a boundary, or several source samples. This edition does not assign centroid colors or modern screen values to historical words. Killarney [Green] and Killarney Green are grouped as one headword; differently modified entries beginning with B, L, or P are not added to the K total.

Historical directory: Kabistan onward

Headword / ID	Keys / category numbers	Documented meaning and qualification
Kabistan KH001	M 151	Dark grayish green. The source cross-reference is Pinegrove. NBS printed p. 121
Kaffa KH002	M, P 46	Grayish reddish brown in both source contexts. M also links the name to Hampstead Brown. NBS printed p. 121
Kaiser Brown KH003	M, R 55	Strong brown in both source contexts. M cross-references Ginger. NBS printed p. 121
Kangaroo KH004	M 113	Olive gray. A historical category; independent of modern paint names. NBS printed p. 121
Kara KH005	M 164	Moderate blue green. The historical descriptive category is not a numerical digital value. NBS printed p. 121
Kara Dagħ KH006	M 267	Black. No particular RGB black is established. NBS printed p. 121

Historical directory: Kasha-Beige onward

Headword / ID	Keys / category numbers	Documented meaning and qualification
Kasha-Beige KH007	M 112, 265	Light olive gray and medium gray. Cross-referenced to Slate-Grey; the two category assignments are preserved. NBS printed p. 121
Kashan KH008	M 169	Strong greenish blue. This is a source-specific historical assignment. NBS printed p. 121
Kashmir KH009	M 137, 145, 150	Dark yellowish green, moderate green, and grayish green. A range of historical categories rather than one point. NBS printed p. 121
Kessler Yellow KH010	M 83, 84, 86, 87	Brilliant yellow, strong yellow, light yellow, and moderate yellow. Spelled Kessler in the consulted scan; cross-referenced to Lemon [Yellow]. NBS printed p. 121
Kazak KH011	M 43	Moderate reddish brown. The entry groups Beef's Blood, Coptic, Oxblood [Red], Piccolpasso Red, and Sang de Boeuf as related names. NBS printed p. 121
Kelly Green KH012	T 131, 132, 141	Strong yellowish green, deep yellowish green, and strong green. Bright Kelly Green is a separately modified entry and is not counted as a K-initial headword here. NBS printed p. 121

Historical directory: Kentucky Green onward

Headword / ID	Keys / category numbers	Documented meaning and qualification
Kentucky Green KH013	M 107	Moderate olive. Do not transfer this assignment to Kentucky Blue. NBS printed p. 121
Kermanshah KH014	M 61	Grayish brown. Cross-referenced to Coconut. NBS printed p. 121
Kermes KH015	M 11	Vivid red. Cross-referenced to Scarlet; the material term is discussed separately. NBS printed p. 121
Kermes Berries KH016	M 11	Vivid red. Cross-referenced to Scarlet; a separate lexical headword from Kermes. NBS printed p. 121
Kettledrum KH017	M 43	Moderate reddish brown. Cross-referenced to Mora Red; the single-word spelling is retained. NBS printed p. 121
Khaki KH018	M, TC 76, 77, 94	M: light yellowish brown and moderate yellowish brown. TC: light olive brown. The source assignments remain separate; none defines the CSS keyword. NBS printed p. 121

Historical directory: Khiva onward

Headword / ID	Keys / category numbers	Documented meaning and qualification
Khiva KH019	M 38	Dark reddish orange. Cross-referenced to Tomato [Red]. NBS printed p. 121
Kildare Green KH020	M, R 120	Moderate yellow green in both source contexts. A shared descriptive category does not prove identical physical samples. NBS printed p. 121
Killarney Green KH021	M, P, R 136, 139, 145	M: moderate yellowish green and moderate green. P: vivid green. R: moderate yellowish green. M prints Killarney [Green]; bracketed and unbracketed forms are grouped as one headword. NBS printed p. 121
Kinema Red KH022	M 12	Strong red. Cross-referenced to Goya. NBS printed p. 121
Kingfisher KH023	M 183	Dark blue. Kept distinct from Kingfisher Blue. NBS printed p. 121
Kingfisher Blue KH024	M 169	Strong greenish blue. The modifying word changes the documented entry. NBS printed p. 121

Historical directory: King Lear onward

Headword / ID	Keys / category numbers	Documented meaning and qualification
King Lear KH025	M 211	Moderate violet. A source-specific historical literary name. NBS printed p. 121
King Neptune KH026	M 181	Light blue. A modern paint with the same name is a separate source context. NBS printed p. 121
King's Blue KH027	M, R 179, 181, 182	M (34G7): light blue. M (43D11): deep blue and moderate blue. M (45A10): moderate blue. R: light blue. Sample locators are retained. Light King's Blue and Pale King's Blue are not separately counted because their displayed names begin with L and P. NBS printed p. 121
King's Ransom KH028	P 53	Moderate orange. This headword does not establish the value of modern King's Ransom Gold. NBS printed p. 121
King's Yellow KH029	M 83, 84, 86, 87	Brilliant yellow, strong yellow, light yellow, and moderate yellow. Cross-referenced to Lemon [Yellow]; historical pigment identity is a separate question. NBS printed p. 121
Kirchberger Green KH030	M 140	Brilliant green. Cross-referenced to Emerald Green. NBS printed p. 121

Historical directory: Kis Kilim onward

Headword / ID	Keys / category numbers	Documented meaning and qualification
Kis Kilim KH031	M 58	Moderate brown. Cross-referenced to Russian Calf. NBS printed p. 121
Kitten's Ear KH032	P 89	Pale yellow. A descriptive historical assignment, not an RGB specification. NBS printed p. 121
Kobe KH033	M 40	Strong reddish brown. Source-specific historical meaning. NBS printed p. 121
Kolinsky KH034	M 59	Dark brown. Cross-referenced to Leaf Mold. NBS printed p. 121
Korea KH035	M 38, 43	Dark reddish orange and moderate reddish brown. Both neighboring category assignments are preserved. NBS printed p. 121
Kork KH036	M 258	Moderate purplish red. Cross-referenced to Orchil; not silently merged with Korkir. NBS printed p. 121

Historical directory: Korkir onward

Headword / ID	Keys / category numbers	Documented meaning and qualification
Korkir KH037	M 258	Moderate purplish red. Cross-referenced to Orchil; retained as its own documented spelling. NBS printed p. 121
Kremlin KH038	M 165	Dark blue green. The modern RAL name Kremlin red is a different entry. NBS printed p. 121
Kronberg's Green KH039	M, R 106, 107, 125	M: moderate olive green. R: light olive and moderate olive. The different source assignments are retained. NBS printed p. 121
Kurdistan KH040	M 187, 193, 229, 235	Dark grayish blue, bluish black, dark grayish purple, and purplish black. A multi-category dark-color range; no single digital value is assigned. NBS printed p. 121
Kyoto KH041	M 26, 50, 53	Strong yellowish pink, strong orange, and moderate orange. The headword is distinct from modern Kyoto Pearl. NBS printed p. 121

Unresolved evidence and name-only records

Fifteen records contain a published RGB/hex disagreement and are excluded from the digital directory. The table records what each source actually displayed and the hex implied by its stated RGB. It does not silently select a winner. These rows have no GKBook swatch or shade-family assignment in the verified inventory.

Source / name	Code	Published hex	Published RGB	Hex from that RGB
Resene / Kabul	BR52-019-061	#857873	133, 120, 113	#857871
Pantone TPG / dealer / Kombu Green	19-0417 TPG	#434D40	66, 76, 64	#424C40
Pantone TPG / dealer / Kalamata	19-0510 TPG	#67645A	103, 100, 89	#676459
Pantone TPG / dealer / Kashmir	17-6319 TPG	#6D8D71	109, 141, 112	#6D8D70
Pantone TPG / dealer / Kale	18-0107 TPG	#60774F	96, 118, 79	#60764F
Pantone TPG / dealer / Kangaroo	18-0920 TPG	#74654F	115, 100, 79	#73644F
Pantone TPG / dealer / Kumquat	14-1052 TPG	#FCAF5A	251, 175, 90	#FBAF5A
Pantone TPG / dealer / Katydid	16-6030 TPG	#69B794	104, 183, 148	#68B794
Pantone TPG / dealer / Kelly Green	16-6138 TPG	#339E66	50, 158, 102	#329E66
Pantone TPG / dealer / Keepsake Lilac	15-2705 TPG	#C2A9B3	193, 168, 178	#C1A8B2
Pantone TPG / dealer / Kelp	17-1022 TPG	#998C6E	152, 139, 109	#988B6D
Pantone TPG / dealer / Kentucky Blue	15-3915 TPG	#A0B0D1	159, 176, 209	#9FB0D1
Pantone TPG / dealer / Ketchup	18-1449 TPG	#984A46	151, 74, 69	#974A45
Pantone TPG / dealer / Kiwi	16-0235 TPG	#7BAC5F	123, 172, 94	#7BAC5E
Pantone TPG / dealer / Khaki	16-0726 TPG	#A09165	160, 145, 100	#A09164

Kabul is a Resene primary-page conflict; the other 14 are TPG dealer-table conflicts. Internally consistent dealer rows are still dealer approximations. The unresolved JSON preserves each source URL and exact original fields. [\[5, 12\]](#)

Verified names without admitted numbers

Name / code	Source	Evidence boundary
Kilim / 2993	Jotun	Primary page describes a golden burnt-red color; no numerical preview admitted.
Khaki / 7039	Jotun	Primary page describes a muted yellowish green; no numerical preview admitted.
Khaki Yellow / 8625	Jotun	Primary page describes a muted greenish yellow; no numerical preview admitted.
Kingston / SW 9677	Sherwin-Williams	Name and code verified in the Emerald Designer Edition table; current RGB not established.

The Jotun pages verify names and qualitative descriptions, but the numerical catalog was not fully retrievable. Only the first page of a regional inventory was recovered; no complete K inventory is claimed. Kingston’s primary table verifies its identity but does not establish an RGB value. These four records are not part of the 323-record numerical count. [34, 36]

Dulux Australia’s full-strength Kinder page was discovered but its required numerical fields were not recovered. Kinder Half and Kinder Quarter have separately verified pages and remain included. Values from another strength, market, or secondary list were not substituted. No K entry was recovered from the consulted Crayola Explore Colors page; that limited result is not a historical or worldwide absence claim. [9, 37]

Glossary

Term	Meaning in this edition
Color name	A linguistic or commercial label. Its source determines how precisely it identifies a color.
Source-specific record	One documented name and digital value within an identified issuer, dataset, or table.
RGB	Red, green, and blue channel coordinates. The encoding/color space must be specified.
Hexadecimal value	Base-16 notation for channel values; #RRGGBB is the six-digit form used here.
sRGB	The RGB color encoding used for this edition’s screen illustrations.
Hue	The attribute commonly described with terms such as red, yellow, green, and blue.
Shade family	GKBook’s broad editorial grouping of a swatch; not a standardized measurement.
Relative luminance	The WCAG quantity calculated from linearized sRGB channels for contrast evaluation.
LRV	A source-reported light reflectance value. Retained as publisher metadata, not derived from the RGB preview.
ISCC-NBS category	A numbered descriptive color-name category in the historical reference; not a modern hex code.
Digital preview	An on-screen representation associated with a name or product, not a physical-match guarantee.
Held record	A source row excluded from the verified digital directory because the available numerical evidence conflicts.

Frequently asked questions

How many colors start with K?

This edition documents 323 source-specific digital records and 41 historical headwords. Those are bounded research counts, not a universal total. Repeated names, overlapping historical vocabulary, and duplicate RGB values are explained in the methodology.

What is the hex code for khaki?

For the CSS keyword, #F0E68C. Other sources publish different Khaki records; cite the system when using the value. [17]

Is every K color here a CSS color?

No. Only khaki is a K-initial CSS named keyword in the consulted table. Commercial and survey records can be expressed with hex, but their names do not thereby become CSS keywords. [17]

Why is Resene Kiwi brown?

Its published digital preview is #6B5A4F, which GKBook places in Brown. The consulted record does not establish the maker's naming story. [5]

Why is there no universal Klein blue, kunzite, or kyanite swatch?

The cited sources describe an artistic material practice or a variable mineral. None of those sources establishes one universal RGB value for the name. [25–28]

Can I convert these codes into a guaranteed paint or print match?

A hex value alone does not specify a paint formulation or a unique CMYK output. A physical or print workflow needs the relevant material reference or color-managed output conditions. [19, 33]

References

Research checked October 14, 2026. References describe the evidence actually consulted. Each digital-directory row links to its own record, with catalog evidence linked where applicable. The complete machine-readable source register includes all record URLs. URLs and source versions can change after this edition.

[1] Behr. Primary color-detail index: 31 K records; 24 individual pages also checked. Current and archived metadata are preserved.

<https://www.behr.com/colors/color-detail/query-index.json>
