

GKBook

Colors That Start With O

Names, source-specific digital values, historical meanings, and independently reviewed shade families

844 digital records	224 historical entries	12 shade families
Exact source previews	Documented category meanings	Independent visual review

An illustrated reference for high school and college readers, with a source-linked alphabetical directory, historical naming evidence, worked examples, and a complete companion atlas.

Research checked: October 14, 2026
Language: US English
Scope: International, source-bounded coverage.

Overview

What belongs on an O-colors page?

Orange, olive, orchid, ochre, opal, and Oxford blue illustrate how varied a color name can be. Some names are exact software definitions. Others describe a product, a material, a historical category, or an informal visual impression. This edition contains 844 source-specific digital records and 224 separately documented historical entries. Each keeps its evidence context.

How to use this reference

Read the comparisons and worked examples first, then use the alphabetical directory or searchable offline page to find a name, source, code, or hex value. The companion atlas places every admitted record in one of twelve reviewed families. CSV and JSON preserve the exact values and provenance. Historical and name-only entries remain useful even when they cannot support one modern numerical swatch.

What the count means

The edition covers the O subsets of the specified inventories, a bounded PPG page selection, a defined Jotun regional catalog, two university palettes, and software and historical sources. It is not a worldwide census. Eight Dulux names beginning with Õ are indexed under O while their source spelling is preserved. A repeated name can identify several different colors; several distinct identities can also share one RGB value.

At a glance

Measure	This edition
Digital records	844; each source context counted once
Distinct displayed names / RGB triplets	681 names / 836 triplets
Evidence groups	23 source/system/version groups
Historical naming entries	224; no digital values invented
Held numerical records	53; excluded from the verified atlas
Alias rows combined	3; alternative names remain searchable in the data

A color name needs a source

Orange has several exact digital conventions

CSS orange is #FFA500. Crayola’s consulted Orange preview is #FF681F. The xkcd survey gives orange as #F97306, while Benjamin Moore Orange 2011-10 is #E0412B. All four are traceable numerical conventions. None should be silently substituted for another merely because the name is the same. [2, 13, 16, 17]

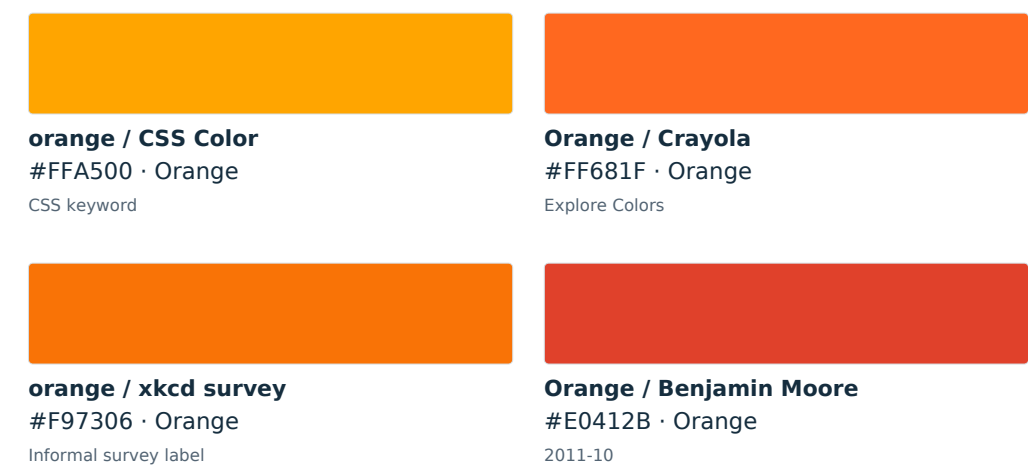

Exact notation does not guarantee identical materials

A CSS keyword is defined by a software specification. A maker’s website RGB field is an exact digital preview of a named product. A dealer conversion is a third-party approximation. Recording each number precisely does not make these evidence types equivalent or turn a screen patch into a physical measurement. Retain the source, code, market, collection, and version. [12, 14, 17, 30]

A product catalog is a defined search boundary

The underlying master catalogs were recovered for the same-day alphabetical research and reused for O extraction. O-specific linked pages were retrieved separately. All 41 current Sherwin-Williams O identities received individual-page numerical checks; 37 also agree with the general table. The four extra Designer Edition entries were found through its name/code table and checked on their pages. An issuer’s table and page corroborate one another within one publisher; they are not independent authorities. [3, 35]

GKBOOK / O-COLORS / FIGURE 1
Orange across four sources
Same word • Four traceable digital conventions

Original GKBook graphic • Research checked October 14, 2026

Figure 1. Orange across four sources CSS, Crayola, xkcd, and Benjamin Moore each supply a particular Orange convention. A shared name does not establish numerical equality.

Record / name	Source	Hex	Family
O0484 / Orange	Benjamin Moore	#E0412B	Orange
O0485 / orange	CSS Color	#FFA500	Orange
O0486 / Orange	Crayola	#FF681F	Orange
O0488 / orange	xkcd survey	#F97306	Orange

Reading RGB and hexadecimal values

A worked example: CSS orange

The notation #RRGGBB contains three hexadecimal pairs, each encoding one eight-bit channel. For #FFA500, FF means $15 \times 16 + 15 = 255$; A5 means $10 \times 16 + 5 = 165$; and 00 means 0. CSS orange is therefore RGB (255, 165, 0). The conversion is arithmetic, not an estimate made by looking at a patch. [17]

The color space matters

This edition interprets the published eight-bit previews as sRGB for illustrations and contrast calculations. Bare channel numbers require an encoding to describe their intended appearance. They are not paint-mixing proportions. Display calibration, viewing conditions, and the material being reproduced can affect what a viewer sees. A screen patch does not capture a material's full spectral or surface behavior. [19, 30]

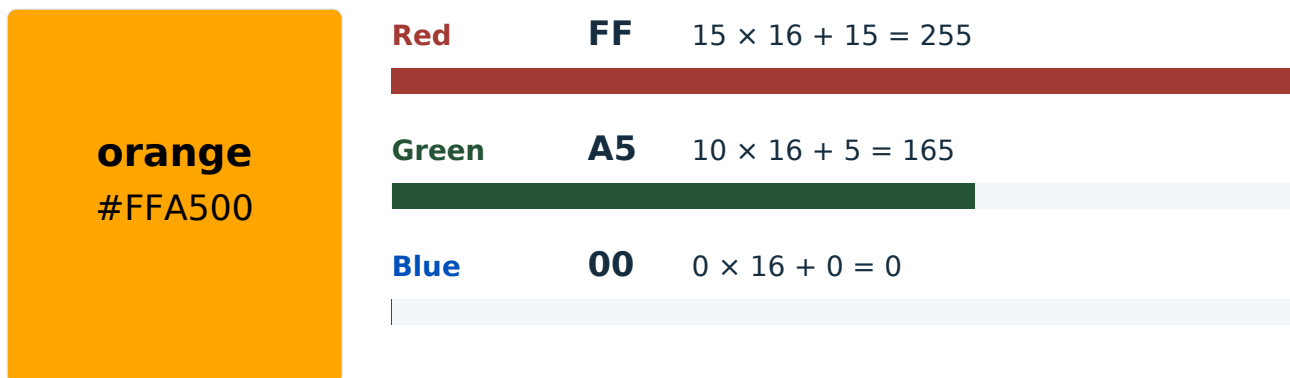

Keep reported LRV separate

The directory preserves source-reported light reflectance values where available. Its calculated relative luminance comes from linearized sRGB and serves the contrast calculation. It is a different quantity from a maker's reported physical reflectance value; one is not silently substituted for the other. [19, 20]

GKBOOK / O-COLORS / FIGURE 2

Reading #FFA500

CSS orange • RGB (255, 165, 0)

Encoded channel values; not pigment-mixing proportions.

Original GKBook graphic • Research checked October 14, 2026

Figure 2. Reading #FFA500 Hex and decimal RGB are exact alternative notations. The illustrations interpret published previews as sRGB.

Six O keywords and the X11 distinction

The CSS names have exact spellings

The consulted CSS Color 4 named-color table contains six O keywords: oldlace, olive, olivedrab, orange, orangered, and orchid. Their values are #FDF5E6, #808000, #6B8E23, #FFA500, #FF4500, and #DA70D6 respectively. This edition identifies the consulted document as the October 9, 2026 Candidate Recommendation Draft. [17]

Spelling can distinguish informal labels

The xkcd data separately contains orangered #FE420F and orange red #FD411E. Its orangeish and orangish are also separate labels, #FD8D49 and #FC824A. These survey spellings are retained as data, not corrected into one preferred English word. A normalized search can help find them, but it must not collapse their numerical identities. [13, 29]

X11 numbered labels are not new CSS keywords

The official X.Org rgb 1.1.1 file has 25 O rows. Combining the explicit case/spacing alternatives OldLace, OliveDrab, and OrangeRed leaves 22 identities. Numbered OrangeRed and Orchid entries remain distinct labels. A numerical equality between two records does not establish that their names are interchangeable in every software system. [18]

Record / name	Source	Hex	Family
O0250 / oldlace	CSS Color	#FDF5E6	White
O0288 / olive	CSS Color	#808000	Green
O0307 / olivedrab	CSS Color	#6B8E23	Green
O0485 / orange	CSS Color	#FFA500	Orange
O0554 / orangered	CSS Color	#FF4500	Orange
O0600 / orchid	CSS Color	#DA70D6	Purple

How GKBook assigns shade families

Judge the patch and keep the original numbers

All 844 admitted records, representing 836 distinct RGB patches, received visual review against a neutral surround. Hue, lightness, chroma, and nearby appearances informed the final assignments. Provisional numerical bins organized the inspection; visual judgments revised 367 record assignments. Every identical triplet shares one final family.

Names and maker categories are separate evidence

Sherwin-Williams On the Rocks SW 7671 has the source category White & Pastel, but its #D0CEC8 preview is grouped here in Gray. Oyster White SW 7637 is also grouped in Gray. CSS oldlace is White; CSS olive is Green. The directory preserves the source names and categories alongside the independently reviewed GKBook families. [3, 17]

The twelve families are navigation categories

Brown includes earthy colors, tans, beiges, ochres, and selected taupes. Gray includes near-neutrals with subdued warm or cool undertones. White includes selected very pale tinted neutrals. Green includes olives, mints, and selected green teals; Blue includes cyan blues and blue-grays. Purple is comparatively red-leaning or balanced, while Violet is comparatively blue-leaning. Pink includes blushes and selected rose colors. These are editorial boundaries, not a new scientific standard.

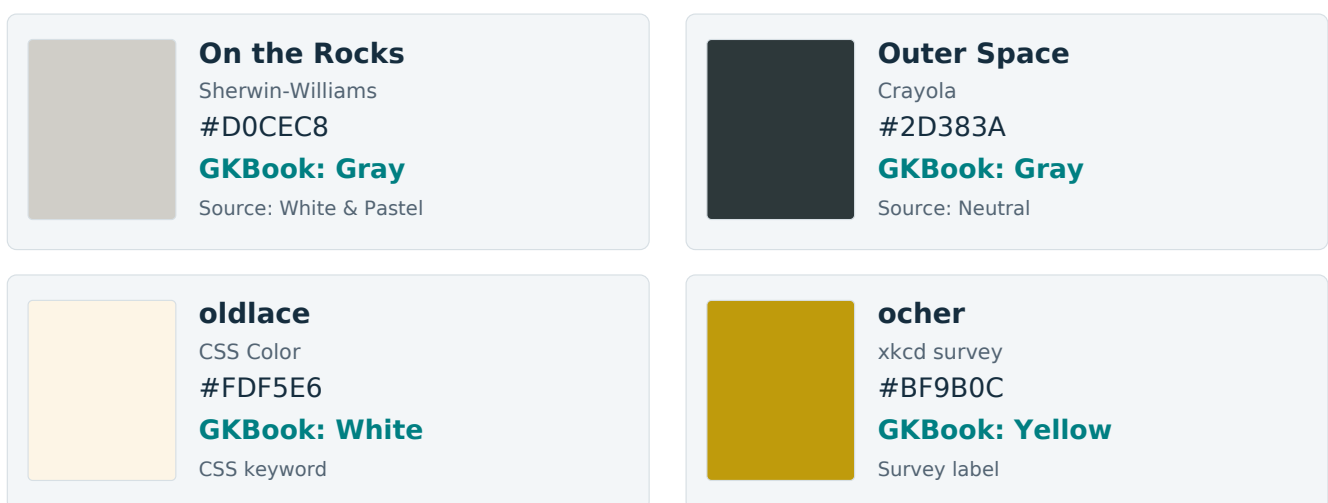

An unexpected family can be correct

Crayola Outer Space is #2D383A and appears here in Gray even though the earlier list called that same value blue. The informal xkcd ocher, ochre, and ocre labels are yellow-dominant previews and fall in Yellow here. Their names remain exactly as supplied by the source. Classification changes the browsing aid, not the underlying specification. [13, 16, 33]

GKBOOK / O-COLORS / FIGURE 3

Read the swatch, keep the name

A source label does not determine the editorial family

Original GKBook graphic • Research checked October 14, 2026

Figure 3. Read the swatch, keep the name On the Rocks has a White & Pastel source category but is grouped here in Gray. Each patch receives its own visual judgment; no numerical value is changed.

Ochre, orpiment, and historical pigments

Ocher and ochre refer to more than web colors

Getty's Art & Architecture Thesaurus identifies yellow ocher as an earth pigment containing goethite and clay; ochre is its British spelling in that entry. That material description does not provide a universal digital value. The xkcd labels ocher #BF9B0C, ochre #BF9005, and ocre #C69C04 are particular survey conventions, not chemical definitions of the earth pigment. [13, 23]

Orpiment is a material identity

CAMEO describes orpiment as an arsenic trisulfide mineral used historically as a pigment, with appearances ranging from lemon yellow toward orange. Its chemistry and history do not select one sRGB triplet. The name-only supplement documents the material, while the historical appendix records the dictionary's category assignments. These are different kinds of evidence. [22, 24]

The dictionary preserves earlier meanings

NBS SP 440 assigns the Maerz and Paul Orpiment entry to several yellow regions. It also records Orpiment Orange separately under two earlier sources. Likewise, Old Gold has different descriptive assignments under Maerz and Paul, Plochere, Ridgway, Taylor, and the Textile Color Card Association. The differences are retained rather than averaged into a new supposedly authoritative patch. [22]

Historical names can require editorial context

The 224-entry appendix transcribes non-inverted O-initial lexical entries in the principal block, including its beginning on printed page 128. Source keys, numbered senses, specification qualifiers, brackets, and sample locators remain visible. Names filed under another initial and inverted index pointers are excluded. Obsolete racialized language is explicitly marked as historical documentation. Earlier source works are represented through NBS; they were not all independently reexamined. [22]

Opal, olivine, and evocative names

Opal is not one flat color

GIA describes opal as hydrated silica occurring in varied colors, with play-of-color produced through diffraction associated with its silica structure. A flat product preview called Opal represents one chosen design convention. It cannot reproduce the changing optical appearance of every opal specimen. The material entry and the digital product entries therefore remain distinct. [25]

Olivine connects a mineral and a color impression

GIA identifies peridot as gem olivine and describes its appearance as yellowish green. That establishes a mineralogical context for the color vocabulary. It does not authenticate the earlier list's #9AB973 as a universal value. The consulted products named Olivine retain their own issuer-specific previews. [26, 33]

Ocean and orchid remain source-specific too

The xkcd survey's ocean #017B92 and ocean blue #03719C are exact dataset values. CSS orchid #DA70D6 and Crayola Orchid #E29CD2 are different documented conventions. Their nature-inspired names provide useful associations, but those associations do not specify one worldwide numerical standard for an ocean, a flower, or a product. [13, 16, 17]

Old does not by itself date a color

Names such as Old Rose, Old Gold, and Old Lavender occur in historical sources and in later commercial vocabulary. The adjective does not establish a product's age or a first-use date. This edition reports the particular evidence available instead of inventing an origin story from a suggestive name. [22]

Oxford and Oklahoma: verify each specification

Oxford blue is internally consistent

Oxford's current central guide gives Oxford blue as RGB (0, 33, 71), #002147. The earlier O list matches that specification exactly. The historical NBS Oxford Blue entry instead records a Maerz and Paul blackish-purple category. A historical lexical assignment is not evidence that the present university guide is wrong; the two describe different source contexts. [22, 27, 33]

Oxford Red needs clarification from the issuer

The same current Oxford page prints RGB (190, 15, 52) for Oxford Red, but its hex field reads #AA1A2D. Those RGB channels encode #BE0F34. This edition holds the row outside the digital directory and atlas, preserving both stated fields and the arithmetic diagnostic. It does not guess which field was intended. Thirty other named O specifications on the page agree internally and are admitted. [27]

Oklahoma Crimson is verified by the current page

The current central Oklahoma guide explicitly gives Oklahoma Crimson as #841617, equivalent to RGB (132, 22, 23). OU Crimson Red is retained as a transparent editorial lookup alias for the earlier list. An older college guide has a conflicting row: RGB (169, 5, 51), which encodes #A90533, alongside #841617. That older row is held separately; it does not invalidate the independent current hex specification. [28, 31, 33]

Oklahoma Cream requires a version qualification

The older college guide gives consistent RGB (253, 249, 216) and #FDF9D8 for Oklahoma Cream. This is included only as a historical guide convention. The current central guide reserves Oklahoma Cream for print and provides no RGB/hex value. The historical patch is documentation, not a recommendation for current digital university communications. The older guide's issue year was not established. [28, 31]

Readable color: a worked contrast example

Calculate from linearized channels

Normalize each eight-bit channel by dividing by 255. For a normalized channel c no greater than 0.04045, use $c/12.92$; otherwise use $((c + 0.055)/1.055)^{2.4}$. Relative luminance is $0.2126R + 0.7152G + 0.0722B$ using those linearized components. Contrast is $(\text{lighter luminance} + 0.05)/(\text{darker luminance} + 0.05)$. [20]

CSS orange favors black text

For #FFA500, calculated relative luminance is approximately 0.481703. Opaque black text gives about 10.63:1 contrast; opaque white gives about 1.97:1. Black meets the normal-text AA contrast threshold, while white is below the large-text threshold. The worked graphic deliberately includes the low-contrast white case so the difference is visible. [17, 20, 21]

Olive shows why the actual numbers matter

CSS olive #808000 gives black text about 5.01:1 and white about 4.20:1. Black meets normal-text AA contrast; white does not, although it exceeds the large-text 3:1 threshold. A dark-looking background does not automatically justify white small text. These are calculated opaque sRGB comparisons, not blanket accessibility certifications. [17, 20, 21]

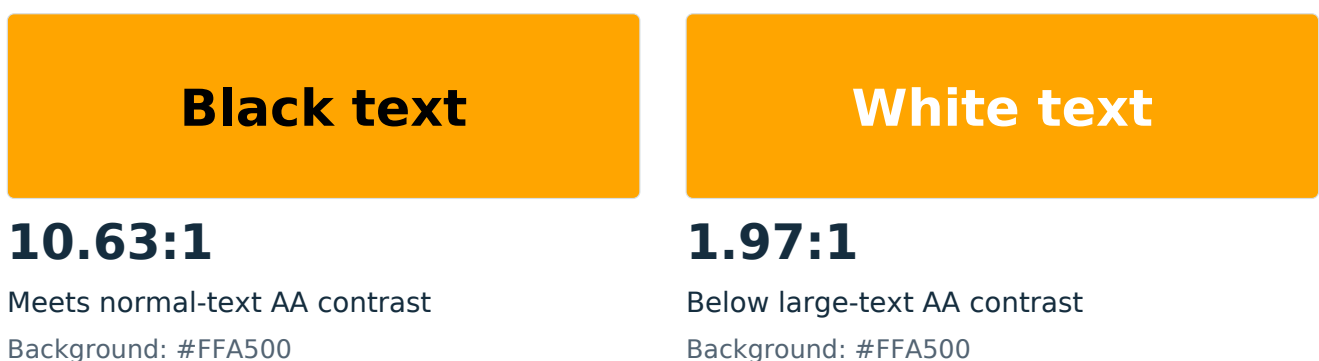

Use unrounded thresholds

WCAG AA generally requires 4.5:1 for normal text and 3:1 for large text, with specified exceptions. Large text means at least 18 points, or 14 points when bold. Compare the unrounded result at a threshold. Images, transparency, interactive states, and the rest of an interface require their own assessment. Labels and identifiers accompany each swatch so color is not the only carrier of information. [21]

GKBOOK / O-COLORS / FIGURE 4

Text contrast on orange

Opaque sRGB colors • Relative luminance $Y \approx 0.481703$

AA: at least 4.5:1 for normal text; 3:1 for large text.

The low-contrast white text is intentional. Compare unrounded ratios at a threshold.

Original GKBook graphic • Research checked October 14, 2026

Figure 4. Text contrast on orange The same background supports one text color and fails another. Ratios follow WCAG 2.2 and do not certify an entire interface.

Evidence gaps and the earlier O list

Fifty-three conflicting rows are held

The dealer tables contain 118 O rows. Fifty-one TPG rows have contradictory RGB and hex fields; 67 consistent dealer previews remain qualified as approximations. Adding the two university conflicts produces 53 held rows. Internal agreement alone does not establish an authenticated current licensed Pantone specification. The conflict register preserves exact URLs and both numerical fields. [12, 27, 31]

A missing number is not filled by sampling a picture

PPG Oxidized MTL115 has a primary product identity but no admitted numerical RGB/hex field in the consulted page. Four additional discovered pages are categories or editorial content rather than individual numerical products. They are logged separately from contradictory rows. Neither a screenshot pixel nor another maker's same-name color supplies the missing specification. [6, 7, 9, 11, 32]

Every supplied legacy row receives a resolution

All 75 rows in o-colors.txt are accounted for. Thirty-seven have exact source-specific matches, 25 have the same name as different consulted values, four have historical name evidence without a verified legacy hex, and nine have no admitted numerical match. An exact match establishes a documented context; it does not reveal the earlier author's unstated source. Unverified is not synonymous with false. [33]

Retain qualifiers that change identity

Olive Drab #7 keeps its #7 as part of the name. It is not stripped as a list number. The supplied Orioles Orange #FB4F14 remains unverified because no consulted official team numerical guide establishes that exact context. Paint named Orioles is not team-brand evidence. These entries remain visible in the reconciliation instead of receiving invented replacements. [33]

Preview differences do not prove reformulation

The current consulted Crayola Orange is #FF681F, which does not verify the earlier list's #FF7538 in its unstated context. Thirty-three code-matched Sherwin-Williams previews differ between older and retained evidence. Four older-only identities remain labeled historical. These findings document digital-source differences, not a demonstrated change in physical pigment or paint formulation. [3, 16, 34]

Source coverage and family guide

Source groups identify distinct evidence contexts. They are not a count of unrelated manufacturers. TCX/TPG dealer previews, the two Sherwin-Williams table contexts, and the university guide versions are deliberately distinguishable. Counts below are after documented alias consolidation.

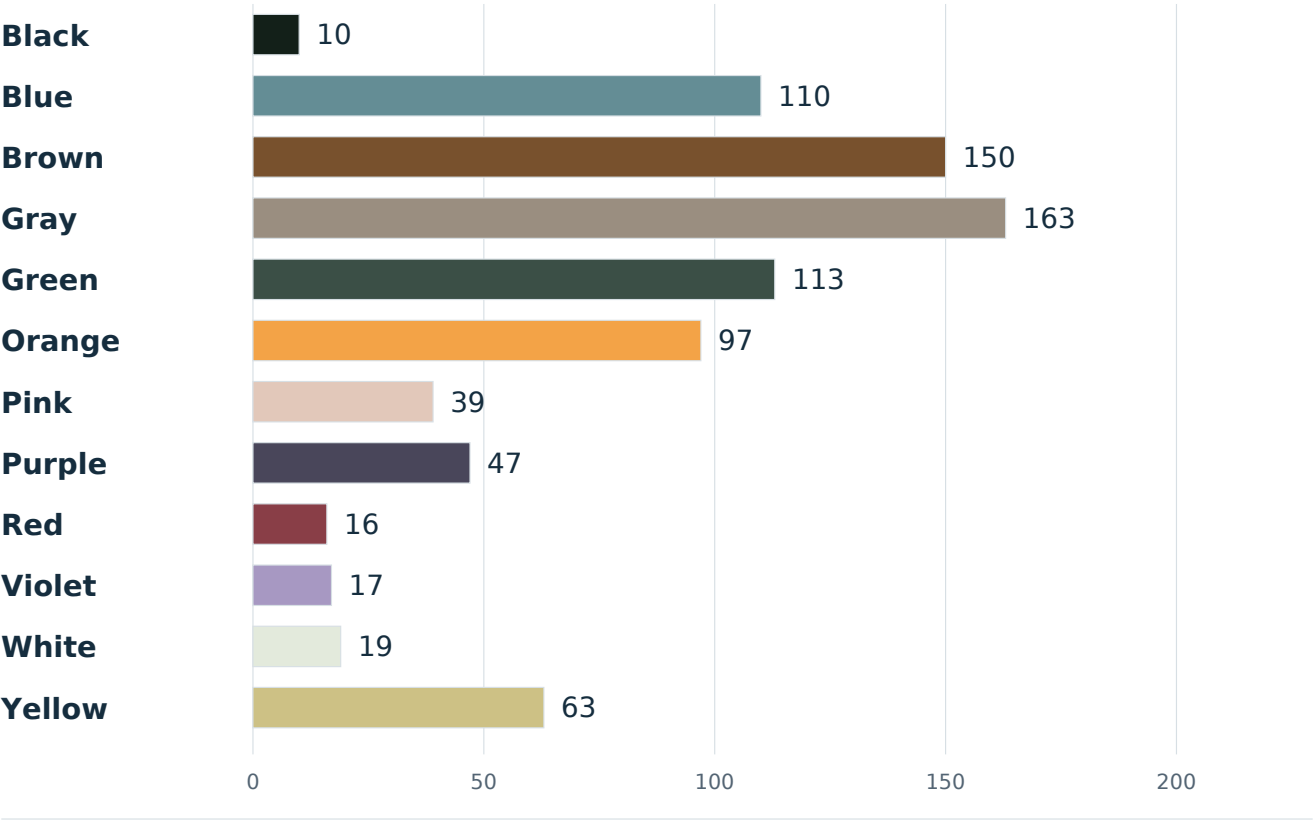

Source group	n	Consulted evidence
Dulux Australia	117	117 numerical identities; includes eight Õ names. [9]
Behr	111	Complete O subset of consulted numerical index. [1]
Benjamin Moore	78	Complete O subset of consulted family inventory. [2]
RAL	68	68 English O names with official CSS approximations. [14]
Pantone TCX / dealer	59	59 consistent dealer previews; licensed values unverified. [12]
Asian Paints	56	All 56 O cards in Decorpro inventory. [8]
Dunn-Edwards	47	47 O identities from 2025 CAD books. [4]
Nerolac	46	46 numerical product pages; category page excluded. [11]
Sherwin-Williams	41	37 general plus four Designer identities; all 41 pages checked. [3]
Resene	36	All 36 linked O numerical previews. [5]
Jotun	32	32 O names from 989 regional identities. [15]
xkcd survey	31	31 informal survey labels. [13]
University of Oxford	30	30 consistent specifications; Oxford Red conflict held. [27]
PPG	25	25 numerical product previews; one additional name-only page. [6]
X.Org X11	22	25 source rows represented by 22 identities. [18]
Little Greene	11	11 individual product hex fields. [10]
Farrow & Ball	10	Ten current/archive product previews. [7]
Pantone TPG / dealer	8	Eight consistent rows; 51 conflicting rows held. [12]
CSS Color	6	All six O keywords in consulted draft. [17]
Crayola	4	Four named Explore Colors previews. [16]
Sherwin-Williams historical table	4	Four older-table contexts; current values unverified. [34]
University of Oklahoma	1	Current Oklahoma Crimson; editorial OU alias explicit. [28]
University of Oklahoma historical guide	1	One older Cream convention; current print-only restriction retained. [31]

Distribution in this edition

GKBOOK / O-COLORS / FIGURE 5

The 12 editorial families

Records in this source-bounded edition • n = 844

Each admitted record is counted once. • Counts do not measure popularity or natural abundance.

Figure 5. The 12 editorial families The distribution reflects consulted catalogs, record boundaries, and GKBook’s final visual judgments. It is not a survey of color popularity.

These counts describe the inventories and editorial boundaries used here. They do not measure worldwide frequency, popularity, natural abundance, or scientific importance.

Family definitions

Family	n	Interpretation / atlas figure
Black	10	Very dark near-neutrals and selected tinted blacks. Figure 6.
Blue	110	Blues, blue-grays, cyan blues, and selected blue teals. Figure 7.
Brown	150	Earthy warm colors, tans, beiges, ochres, and selected taupes. Figure 8.
Gray	163	Near-neutrals with subdued warm, cool, green, or violet undertones. Figure 9.
Green	113	Greens, mints, olives, yellow-greens, and selected green teals. Figure 10.
Orange	97	Oranges, peaches, salmon-oranges, and selected warm ambers. Figure 11.
Pink	39	Pinks, blushes, roses, and selected coral or deep rose colors. Figure 12.
Purple	47	Comparatively red-leaning or balanced purples, mauves, and plums. Figure 13.
Red	16	Reds, crimsons, burgundies, and selected brick colors. Figure 14.
Violet	17	Comparatively blue-leaning purples and selected lavenders. Figure 15.
White	19	Very pale near-neutrals and selected tinted whites. Figure 16.
Yellow	63	Yellows, creams, golden colors, and selected yellow chartreuses. Figure 17.

Figures 6–17 span 34 labeled atlas sheets. Every one of the 844 digital records appears exactly once. Pale patches have borders; identifiers and numerical values accompany every patch.

Alphabetical digital directory

Family is GKBook’s visual judgment. Each hex/RGB pair is exactly equivalent. The evidence note preserves source categories, archive flags, LRVs, aliases, and limitations. No product code is invented when the consulted page omits it. Proper source spellings and regional names remain intact; their initial letter is the selection rule.

Evidence type	Records
primary issuer	741
dealer approximation	67
survey label	31
historical issuer table	5

Aliases and source versions

Three X11 case/spacing alternatives—OldLace, OliveDrab, and OrangeRed—are consolidated. The retained names and aliases remain searchable. Distinct lexical and numbered labels remain separate identities even when values coincide. Two duplicate Dulux URLs point to retained identities. OU Crimson Red is an additional editorial lookup alias for the official Oklahoma Crimson name, not a separate counted color. [\[9, 18, 28\]](#)

Alternative name	Retained record	Source / identifier
OldLace	old lace / O0251	X.Org X11 / rgb 1.1.1
OliveDrab	olive drab / O0311	X.Org X11 / rgb 1.1.1
OrangeRed	orange red / O0555	X.Org X11 / rgb 1.1.1

The source-version JSON preserves 33 code-matched differences between the older Sherwin-Williams table and retained previews. Four older-only identities remain explicitly qualified. Such differences do not establish physical reformulation. [\[3, 34\]](#)

Historical O-color names

The 224 entries below are transcribed from the scanned principal O block on printed pages 128–132 (PDF pages 164–168) of NBS SP 440. O-initial modified forms are included; inverted index pointers and modified names beginning with another letter are excluded. This is a bounded transcription, not an exhaustive search for O words filed elsewhere in the dictionary. [22]

Key	Earlier source interpreted by NBS
A	American Association of Textile Chemists and Colorists and Society of Dyers and Colourists.
B	H. A. Dade, Color Terminology in Biology.
F	Federal Specification TT-C-595, Colors; (for) Ready-Mixed Paints.
H	R. F. Wilson, Horticultural Colour Charts.
M	Maerz and Paul, A Dictionary of Color, first edition.
MUP	Commercial Standard CS147-47, Colors for Molded Urea Plastics.
P	Plochere Color System.
R	Ridgway, Color Standards and Color Nomenclature.
RC	National Research Council, Rock-Color Chart.
S	William H. Beck, Postage-Stamp Color Names.
SC	U.S. Department of Agriculture Soil Color Charts.
T	Taylor, Knoche, and Granville, Descriptive Color Names Dictionary.
TC	Textile Color Card Association: Standard Color Card of America and U.S. Army Color Card.

Each source assignment is expanded separately; a category region is not a unique RGB triplet. Source spellings and surviving sample locators remain explicit. Numbered Olivaceous Black senses, specification-qualified Olive Drab entries, and identified Maerz and Paul samples remain distinct. Obsolete and potentially offensive historical labels are retained solely for documentary accuracy, with a note; they are not recommended modern names.

Historical directory: Oad onward

Headword / ID	Keys / numbers	Documented meaning and qualification
Oad OH001	M: 186	M: grayish blue. Cross-referenced to Woad in the dictionary. NBS printed p. 128

Orient Red OH192	H: 11; M: 12	H: vivid red. M: strong red. NBS printed p. 132

Historical directory: Orient [Yellow] (M 13L6) onward

Headword / ID	Keys / numbers	Documented meaning and qualification
Orient [Yellow] (M 13L6) OH193	M: 88, 91	M: dark yellow, dark grayish yellow. Maerz and Paul sample locator 13L6; brackets retained. NBS printed p. 132
Orient Yellow (M 9L8) OH194	M: 50, 53, 68, 71	M: strong orange, moderate orange, strong orange yellow, moderate orange yellow. Maerz and Paul sample locator 9L8; first listed sense. NBS printed p. 132
Oriole OH195	M: 54	M: grayish orange. NBS printed p. 132
Orion OH196	M: 183	M: dark blue. NBS printed p. 132
Orlean OH197	M: 29	M: moderate yellowish pink. NBS printed p. 132
Ormond OH198	M: 45, 60, 63	M: light grayish reddish brown, light grayish brown, light brownish gray. NBS printed p. 132

Historical directory: Orpiment onward

Headword / ID	Keys / numbers	Documented meaning and qualification
Orpiment OH199	M: 83, 84, 86, 87	M: brilliant yellow, strong yellow, light yellow, moderate yellow. NBS printed p. 132
Orpiment Orange OH200	H: 48, 50; M: 48, 50	H: vivid orange, strong orange. M: vivid orange, strong orange. NBS printed p. 132
Orpiment Red OH201	M: 68, 71	M: strong orange yellow, moderate orange yellow. NBS printed p. 132
Orpin OH202	M: 83, 84, 86, 87	M: brilliant yellow, strong yellow, light yellow, moderate yellow. NBS printed p. 132
Orseille OH203	M: 258	M: moderate purplish red. NBS printed p. 132
Otter [Brown] OH204	M: 81	M: dark grayish yellowish brown. Brackets retained. Obsolete racialized cross-reference wording is not reproduced. NBS printed p. 132

Historical directory: Oural Green onward

Headword / ID	Keys / numbers	Documented meaning and qualification
Oural Green OH205	M: 135, 148; R: 134, 135	M: light yellowish green, very pale green. R: very light yellowish green, light yellowish green. NBS printed p. 132
Owl OH206	M: 64	M: brownish gray. NBS printed p. 132
Oxblood Red OH207	H: 16	H: dark red. NBS printed p. 132
Oxblood [Red] OH208	M: 43	M: moderate reddish brown. Brackets retained from the dictionary. NBS printed p. 132
Ox-blood Red OH209	R: 13	R: deep red. Hyphenated source spelling retained. NBS printed p. 132
Oxford Blue OH210	M: 230	M: blackish purple. Historical dictionary sense; not the current university digital specification. NBS printed p. 132

Historical directory: Oxford Chrome onward

Headword / ID	Keys / numbers	Documented meaning and qualification
Oxford Chrome OH211	M: 71	M: moderate orange yellow. NBS printed p. 132
Oxford Gray OH212	T: 266	T: dark gray. NBS printed p. 132
Oxford Ochre OH213	M: 71	M: moderate orange yellow. NBS printed p. 132
Oxford Yellow OH214	M: 71	M: moderate orange yellow. NBS printed p. 132
Oxgall OH215	M: 84	M: strong yellow. NBS printed p. 132
Oxheart OH216	M: 13	M: deep red. NBS printed p. 132

Historical directory: Oxide Blue onward

Headword / ID	Keys / numbers	Documented meaning and qualification
Oxide Blue OH217	M: 167; R: 178, 182	M: vivid greenish blue. R: strong blue, moderate blue. NBS printed p. 132
Oxide Brown OH218	M: 43	M: moderate reddish brown. NBS printed p. 132
Oxide Purple OH219	M: 43	M: moderate reddish brown. NBS printed p. 132
Oxide Yellow OH220	M: 71	M: moderate orange yellow. NBS printed p. 132
Oyster Gray (MA) OH221	F: 264	F: light gray. Specification qualifier retained. NBS printed p. 132
Oyster Grey OH222	M: 121	M: pale yellow green. NBS printed p. 132

Historical directory: Oyster [White] onward

Headword / ID	Keys / numbers	Documented meaning and qualification
Oyster [White] OH223	M: 121	M: pale yellow green. Brackets retained from the dictionary. NBS printed p. 132
Oyster White OH224	T: 263, 264	T: white, light gray. NBS printed p. 132

Unresolved numerical evidence

53 source rows are held. The table preserves the published hex and RGB; the final column is the exact hex calculated from that RGB, not an editorial correction. All held rows contain conflicting numerical fields. None receives an admitted digital swatch in this edition.

The unresolved JSON includes each exact source URL and reason. Dealer qualifiers remain necessary even for admitted internally consistent rows. The held university rows also retain their distinct current/older contexts. [\[12, 27, 31\]](#)

Name-only evidence and scope gaps

Name / source	Evidence boundary
Ocher / Ochre (pigment) / Getty AAT	Yellow earth pigment containing goethite and clay. The material identity does not specify one universal sRGB triplet.
Orpiment (pigment) / MFA Boston / CAMEO	Historical yellow-to-orange mineral pigment. Composition and material appearance do not establish a unique modern RGB number.
Opal (gem material) / GIA	Variable body color and, in precious opal, play-of-color. A flat paint preview named Opal is a separate convention.
Olivine (gem context) / GIA	Peridot is gem olivine, described as yellowish green. No universal digital triplet is inferred for all specimens.
Oklahoma Cream (current) / University of Oklahoma	Reserved for print; no RGB/hex is stated. The separately labeled older #FDF9D8 convention is documentation, not a current digital recommendation.
Oxidized / PPG	Primary page establishes the product identity; no numerical RGB/hex admitted. No pixels are sampled to invent a specification.

Material names, current print-only Oklahoma Cream, and PPG Oxidized MTL115 retain their own evidence boundaries. Four category/editorial pages are logged outside individual-product scope. PPG is a bounded page selection; Jotun is the O subset of a 989-record regional inventory. [\[6, 15, 23–26, 28, 32\]](#)

Reconciliation of the earlier O list

All 75 rows from the supplied o-colors.txt are accounted for below. An exact match establishes a documented source context, not the original author's unstated intent. Same-name values from different issuers are not interchangeable. Original legacy families remain comparison input. [33]

Legacy entry / value	Evidence outcome	Resolution / matched IDs
OL001 / Ocean / #017B92 / blue	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0067
OL002 / Ocean Blue 1 / #03719C / blue	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0075
OL003 / Ocean Blue 2 / #4F42B5 / blue	Same name, different consulted values	Keep this legacy value unverified. A different issuer's same-name preview is not an interchangeable correction.
OL004 / Ocean Boat Blue / #0077BE / blue	Legacy numerical claim unverified	A traceable source-specific numerical specification is still required. No replacement is inferred from the name.
OL005 / Ocean Green 1 / #3D9973 / green	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0105
OL006 / Ocean Green 2 / #48BF91 / green	Same name, different consulted values	Keep this legacy value unverified. A different issuer's same-name preview is not an interchangeable correction.
OL007 / Ocher / #BF9B0C / brown	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0141
OL008 / Ochre 1 / #BF9005 / brown	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0144
OL009 / Ochre 2 / #CC7722 / brown	Same name, different consulted values	Keep this legacy value unverified. A different issuer's same-name preview is not an interchangeable correction.
OL010 / Ocre / #C69C04 / brown	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0151
OL011 / Off Blue / #5684AE / blue	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0171
OL012 / Off Green / #6BA353 / green	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0174
OL013 / Off White 1 / #FAF9F6 / white	Same name, different consulted values	Keep this legacy value unverified. A different issuer's same-name preview is not an interchangeable correction.
OL014 / Off White 2 / #FFFFE4 / white	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0188
OL015 / Off Yellow / #F1F33F / yellow	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0190

Legacy entry / value	Evidence outcome	Resolution / matched IDs
OL016 / Ogre Odor / #FD5240 / pink	Legacy numerical claim unverified	A traceable source-specific numerical specification is still required. No replacement is inferred from the name.
OL017 / Old Burgundy / #43302E / red	Historical name; legacy hex unverified	Preserve the historical meaning and category references; omit the unsupported number from the verified digital directory.
OL018 / Old Gold / #CFB53B / yellow	Same name, different consulted values	Keep this legacy value unverified. A different issuer's same-name preview is not an interchangeable correction.
OL019 / Old Lace / #FDF5E6 / white	Exact source-specific match	CSS oldlace and X11 old lace exactly establish #FDF5E6. This pale warm preview is grouped in White; maker-specific Old Lace values remain separate. Matched IDs: O0250, O0251
OL020 / Old Lavender / #796878 / gray	Historical name; legacy hex unverified	Preserve the historical meaning and category references; omit the unsupported number from the verified digital directory.
OL021 / Old Mauve / #673147 / purple	Same name, different consulted values	Keep this legacy value unverified. A different issuer's same-name preview is not an interchangeable correction.
OL022 / Old Moss Green / #867E36 / green	Historical name; legacy hex unverified	Preserve the historical meaning and category references; omit the unsupported number from the verified digital directory.
OL023 / Old Pink / #C77986 / pink	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0266
OL024 / Old Rose 1 / #C08081 / pink	Same name, different consulted values	Keep this legacy value unverified. A different issuer's same-name preview is not an interchangeable correction.
OL025 / Old Rose 2 / #C87F89 / pink	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0269
OL026 / Old Silver / #848482 / gray	Historical name; legacy hex unverified	Preserve the historical meaning and category references; omit the unsupported number from the verified digital directory.
OL027 / Olive / #808000 / green	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0288, O0291
OL028 / Olive Brown / #645403 / brown	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0300
OL029 / Olive Drab / #6F7632 / brown	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0312
OL030 / Olive Drab #7 / #3C341F / brown	Legacy numerical claim unverified	The #7 qualifier remains part of the name. It is not stripped as a list variant number. No consulted primary specification verifies this exact numbered name/value.
OL031 / Olive Green 1 / #677A04 / green	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0325
OL032 / Olive Green 2 / #B5B35C / green	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0321
OL033 / Olive Yellow / #C2B709 / yellow	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0366

Legacy entry / value	Evidence outcome	Resolution / matched IDs
OL034 / Olivine / #9AB973 / green	Same name, different consulted values	Keep this legacy value unverified. A different issuer's same-name preview is not an interchangeable correction.
OL035 / Onyx / #353839 / gray	Same name, different consulted values	Keep this legacy value unverified. A different issuer's same-name preview is not an interchangeable correction.
OL036 / Opal / #A8C3BC / green	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: 00417
OL037 / Opera Mauve / #B784A7 / purple	Same name, different consulted values	Keep this legacy value unverified. A different issuer's same-name preview is not an interchangeable correction.
OL038 / Opera Red / #FF1B2D / red	Legacy numerical claim unverified	A traceable source-specific numerical specification is still required. No replacement is inferred from the name.
OL039 / Orange 1 / #FF5800 / orange	Same name, different consulted values	The consulted Crayola Orange preview is #FF681F; CSS orange is #FFA500 and xkcd orange is #F97306. None verifies this supplied value in its unstated context; a changed preview alone does not establish reformulation.
OL040 / Orange 2 / #FF6600 / orange	Same name, different consulted values	The consulted Crayola Orange preview is #FF681F; CSS orange is #FFA500 and xkcd orange is #F97306. None verifies this supplied value in its unstated context; a changed preview alone does not establish reformulation.
OL041 / Orange 3 / #FF7538 / orange	Same name, different consulted values	The consulted Crayola Orange preview is #FF681F; CSS orange is #FFA500 and xkcd orange is #F97306. None verifies this supplied value in its unstated context; a changed preview alone does not establish reformulation.
OL042 / Orange 4 / #FF7F00 / orange	Same name, different consulted values	The consulted Crayola Orange preview is #FF681F; CSS orange is #FFA500 and xkcd orange is #F97306. None verifies this supplied value in its unstated context; a changed preview alone does not establish reformulation.
OL043 / Orange 5 / #FF8000 / orange	Same name, different consulted values	The consulted Crayola Orange preview is #FF681F; CSS orange is #FFA500 and xkcd orange is #F97306. None verifies this supplied value in its unstated context; a changed preview alone does not establish reformulation.
OL044 / Orange 6 / #FFA500 / orange	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: 00485, 00487
OL045 / Orange Brown / #BE6400 / brown	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: 00504
OL046 / Orange Peel / #FF9F00 / orange	Same name, different consulted values	Keep this legacy value unverified. A different issuer's same-name preview is not an interchangeable correction.
OL047 / Orange Pink / #FF6F52 / pink	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: 00551
OL048 / Orange Red / #FF5349 / red	Same name, different consulted values	Keep this legacy value unverified. A different issuer's same-name preview is not an interchangeable correction.
OL049 / Orange Red 1 / #FD411E / red	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: 00557

Legacy entry / value	Evidence outcome	Resolution / matched IDs
OL050 / Orange RYB / #FB9902 / orange	Legacy numerical claim unverified	A traceable source-specific numerical specification is still required. No replacement is inferred from the name.
OL051 / Orange Soda / #FA5B3D / orange	Legacy numerical claim unverified	A traceable source-specific numerical specification is still required. No replacement is inferred from the name.
OL052 / Orange Yellow / #F8D568 / yellow	Same name, different consulted values	Keep this legacy value unverified. A different issuer's same-name preview is not an interchangeable correction.
OL053 / Orange Yellow 1 / #F5BD1F / yellow	Same name, different consulted values	Keep this legacy value unverified. A different issuer's same-name preview is not an interchangeable correction.
OL054 / Orange Yellow 3 / #FFAD01 / yellow	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0589
OL055 / Orangeish / #FD8D49 / orange	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0533
OL056 / Orangey Brown / #B16002 / brown	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0586
OL057 / Orangey Red / #FA4224 / red	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0590
OL058 / Orangey Yellow / #FDB915 / yellow	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0591
OL059 / Orangish / #FC824A / orange	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0593
OL060 / Orangish Brown / #B25F03 / brown	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0594
OL061 / Orangish Red / #F43605 / red	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0595
OL062 / Orchid 1 / #DA70D6 / purple	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0600, O0605
OL063 / Orchid 2 / #E29CD2 / purple	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0601
OL064 / Orchid Pink / #F2BDCD / pink	Same name, different consulted values	Keep this legacy value unverified. A different issuer's same-name preview is not an interchangeable correction.
OL065 / Orioles Orange / #FB4F14 / orange	Legacy numerical claim unverified	No consulted official Orioles numerical guide verifies this exact name/value/version. Keep #FB4F14 unverified; similarly named paint colors are not team-brand evidence.
OL066 / Ou Crimson Red / #841617 / red	Exact source-specific match	The official current name is Oklahoma Crimson, #841617. OU Crimson Red remains an explicit editorial lookup alias. The current page independently verifies the hex despite the conflicting RGB in the older college guide. Matched IDs: O0219

Legacy entry / value	Evidence outcome	Resolution / matched IDs
OL067 / Outer Space 1 / #2D383A / blue	Exact source-specific match	Retain with the matched issuer/system and code. Use the reviewed GKBook family; the old family remains comparison input. Matched IDs: O0744
OL068 / Outer Space 2 / #414A4C / gray	Same name, different consulted values	Keep this legacy value unverified. A different issuer's same-name preview is not an interchangeable correction.
OL069 / Outrageous Orange 1 / #FF6037 / orange	Same name, different consulted values	Keep this legacy value unverified. A different issuer's same-name preview is not an interchangeable correction.
OL070 / Outrageous Orange 2 / #FF6E4A / orange	Same name, different consulted values	Keep this legacy value unverified. A different issuer's same-name preview is not an interchangeable correction.
OL071 / Oxblood 1 / #4A0000 / brown	Same name, different consulted values	Keep this legacy value unverified. A different issuer's same-name preview is not an interchangeable correction.
OL072 / Oxblood 2 / #800020 / red	Same name, different consulted values	Keep this legacy value unverified. A different issuer's same-name preview is not an interchangeable correction.
OL073 / Oxford Blue / #002147 / blue	Exact source-specific match	The current university guide gives RGB 0, 33, 71 and #002147 consistently. Retain this exact university-specific convention; historical dictionary and paint meanings remain separate. Matched IDs: O0785
OL074 / Oxley 1 / #6D9A79 / green	Legacy numerical claim unverified	A traceable source-specific numerical specification is still required. No replacement is inferred from the name.
OL075 / Oxley 2 / #779E86 / green	Legacy numerical claim unverified	A traceable source-specific numerical specification is still required. No replacement is inferred from the name.

Glossary

Term	Meaning
Color name	A label whose meaning depends on a source or descriptive context.
Source-specific identity	A name within an issuer, system, code, market, collection, or version.
Hexadecimal	Base-16 notation; #RRGGBB encodes three eight-bit channels.
sRGB	The encoding used for the screen illustrations and contrast calculations.
LRV	Source-reported reflectance metadata, separate from preview luminance.
Shade family	GKBook’s visual navigation category, separate from a maker’s category.
Alias	A documented spelling alternative or an explicitly identified lookup label.
Dealer approximation	A third-party preview, not an authenticated licensed physical standard.
Historical category	An ISCC–NBS descriptive region, not one unique RGB triplet.
Pigment identity	A material designation that needs composition and application context.
Relative luminance	A weighted quantity calculated from linearized sRGB components.
Contrast ratio	The luminance ratio for a specified foreground/background pair.
Held record	A source row excluded from the numerical atlas because its fields conflict.
Name-only evidence	Evidence for an identity without an admitted numerical specification.
Legacy reconciliation	An accounting of every supplied older row against the consulted evidence.

Frequently asked questions

What are some colors that start with O?

Orange, olive, orchid, ochre, opal, old rose, and Oxford blue are examples. Choose a specific source before assigning an exact digital value.

What is the hex code for orange?

CSS orange is #FFA500. The consulted Crayola Orange is #FF681F and xkcd orange is #F97306. Each belongs to a different source convention. [13, 16, 17]

Is olive brown or green?

CSS olive #808000 is grouped here in Green. Products and historical descriptions using olive vocabulary can occupy other families; the source-specific patch must be inspected. [17, 22]

Is ochre a pigment or a digital color?

It can be a material name, a product name, or an informal digital label. Getty's pigment description and the xkcd numerical labels make different kinds of claims. [13, 23]

Can Oxford Red be copied from this page?

Its current issuer row is held because RGB and hex disagree. The appendix preserves the conflict; no intended value is guessed. Oxford blue is independently consistent at #002147. [27]

How many O colors are there?

This edition contains 844 admitted digital records and 224 historical lexical entries within stated sources. Neither count is a worldwide total, and historical categories are not additional verified RGB colors.

Can these previews specify physical paint?

Use the current issuer's product code, market, finish, and physical reference. A numerical screen preview does not replace a physical standard or sample.

Is the page already online?

The HTML is a complete offline publication file. No live website has been modified or published.

References

Research checked October 14, 2026. The descriptions state what was actually consulted. Individual record URLs and catalog verification fields are also supplied in JSON and in the directory. Source URLs and versions may change after this edition.

[1] Behr. Primary color-detail JSON index; all 111 O-initial records recovered. Explicit RGB/hex, source categories, LRVs, and archive flags retained.
