Colors That Start With W

Names, source-specific digital values, historical meanings, and independently reviewed shade families

1,531 digital records	121 historical entries	12 shade families
Exact source previews	Documented category meanings	Independent visual review

An illustrated reference for high school and college readers, with a source-linked alphabetical directory, historical naming evidence, worked examples, and a complete companion atlas.

Research checked: October 16, 2026
Language: US English
Scope: International, source-bounded coverage.

Overview

What are colors that start with W?

White, wheat, wisteria, wine, walnut, water blue, warm gray and wild strawberry are examples of W color names. Their meanings come from different sources: web standards, manufacturers, historical dictionaries, natural materials and informal naming surveys. This edition documents 1,531 source-specific digital records and 121 historical headwords, with a separate resolution for each of the 46 entries in the earlier list.

A useful color record includes its context

A name alone rarely identifies one exact color. Wheat in CSS, a paint maker’s Wheat and a historical Wheat category can all be valid in their own settings. This reference keeps the original name, source, product code or system, numerical evidence, date and visual family together. It does not turn a screen preview into a physical paint standard. [\[1-22\]](#)

How to use the page

Search the directory by name, source or code. Compare exact patches in the companion atlas. Read the historical register for documented meanings without invented hex values, and consult the legacy appendix for the outcome of each original claim. The twelve shade families are navigation judgments based on the displayed colors; they are separate from names and manufacturer categories.

At a glance

Measure	This edition
Digital records	1,531; each source context counted once
Distinct displayed names / RGB triplets	1128 names / 1458 triplets
Evidence groups	25 source/system/version groups
Historical naming entries	121; no digital values invented
Held numerical records	53; excluded from the verified atlas
Alias rows combined	7; alternative names remain searchable in the data

What counts as a W-color record?

Natural initial letters

An admitted digital name begins naturally with W in the source. Original spelling, punctuation and meaningful system suffixes remain intact. Adding a company name before an otherwise unrelated color does not manufacture a new W entry. Walmart's palette color White qualifies; its True Blue is discussed as a relevant legacy correction rather than renamed Walmart Blue.

Separate identities can share a name

Two issuers can use the same name for different numerical previews. One issuer can also have separate codes, markets or material systems. Each documented context is retained. Case and spacing variants in the same X.Org release are consolidated only when the numerical identity agrees. [\[18\]](#)

Evidence boundaries

Consistent owner fields, explicitly qualified dealer approximations and exact survey values can be documented digitally. Contradictory RGB/hex pairs are held outside the atlas. Historical descriptions, material identities and unsupported public-list values remain useful context but receive no invented digital precision.

Wheat, white and whitesmoke in CSS

Three exact keywords

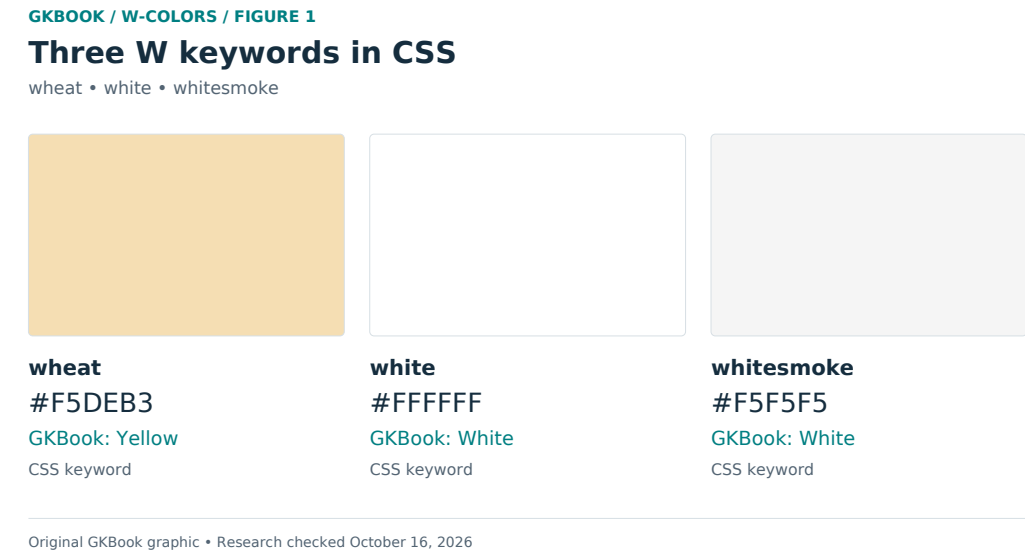

The consulted CSS named-color table has three W-initial keywords: wheat #F5DEB3, white #FFFFFF and whitesmoke #F5F5F5. Their RGB triplets are (245,222,179), (255,255,255) and (245,245,245), respectively. The stable CSS Color 3 Recommendation corroborates the Color 4 draft. [17, 36]

A display heading is not code

White Smoke can be a readable article heading, but the CSS keyword has no space: whitesmoke. Names from paint catalogs or X.Org are not automatically valid CSS keywords. Use a numerical color such as color: #F5DEB3 when a keyword is not defined.

White is not transparency

Opaque white supplies white color channels. Transparency lets underlying content contribute to the result; CSS transparent is a separate keyword. Likewise, white paper, a white pigment and the white point of a display are different physical or technical contexts. None is completely described by the everyday word alone. [17, 19, 29, 36]

Wisteria, wine and other shared names

Keep source-specific Wisterias

Crayola's consulted Wisteria preview is #C9A0DC. The xkcd survey supplies wisteria as #A87DC2. These support the earlier numbered variants as separate naming contexts, not as Wisteria 1 and Wisteria 2 standards. The historical dictionary also distinguishes Wistaria and Wisteria forms. [13, 16, 22]

Wine is not one universal red

The xkcd dataset gives wine as #80013F and wine red as #7B0323. These are informal naming-survey records. NBS reports broader historical Wine and Wine Red categories, and manufacturers use their own codes. A bottle label, grape variety or poetic color name does not establish a unique numerical specification. [13, 22, 32]

Modifiers need evidence too

Warm, wild, winter and white can be genuine parts of an issuer's name. They do not create systematic color families with predictable numbers. An original name can be figurative: a product called White might have a tinted preview, and a Winter Sky name need not mean the same color in two catalogs.

Crayola names and the legacy duplicates

Four directly checked web previews

The consulted owner inventory supplies White #FFFFFF, Wild Blue Yonder #7A89B8, Wild Strawberry #FF3399 and Wisteria #C9A0DC. The values are exact readings of named web swatches, not measurements of crayon marks on paper. [16]

Resolve the numbered rows by source

The legacy Wild Blue Yonder 1 agrees with the owner preview; Wild Blue Yonder 2 #A2ADD0 does not. Wild Strawberry 1 agrees with the owner preview; Wild Strawberry 2 #FF43A4 does not. Do not label the unmatched numbers as current Crayola specifications without a dated owner source. The audit correctly identified the Wild Blue Yonder reversal. [16, 33]

History supports names, not arbitrary hex codes

Crayola's history identifies Wild Strawberry among additions in 1990 and Wild Blue Yonder among additions in 2003. That attests the names and timing. It does not authenticate every online number associated with them. Other legacy labels absent from this consulted inventory remain explicitly unverified here; absence from one inventory is not proof they never existed. [31]

Walmart blue: a correction to the audit itself

Use the current owner specification

Walmart's current brand-center page names True Blue and links a specification image that prints HEX #0053E2 and R0 G83 B226. Those numerical fields agree. The owner's January 2025 refresh announcement independently documents the palette context. [\[23, 24\]](#)

Neither old suggestion is the current answer

The original #007DC6 and the audit's proposed #0071CE should not be presented as the current True Blue specification. Use #0053E2 for the checked current owner context, with the name and retrieval date. A number can be accurate for one historical guide and still be the wrong answer for a current guide.

Historical eras require their own evidence

The four legacy year-to-hex mappings were not authenticated by a primary period guide in this research. Preserve them as unresolved supplied claims. The #030303 row is visibly black, but merely renaming it Walmart Black would not validate its dates or numerical origin. No logo pixels were sampled to manufacture a historical standard. [\[33\]](#)

Wageningen Green and Windows Blue

A dated institutional clue

A search-indexed Wageningen UR Colour Reference Card, version 2.0, September 2013, gives #34B233 and RGB (52,178,51). This supports a narrowly dated institutional context for the legacy number. Direct retrieval of the owner PDF returned 404 during this research, so it is disclosed as indexed historical corroboration rather than a fully rechecked current guide. [\[30\]](#)

Do not extend a historical guide into the present

The source refers to a green entry in a particular institutional palette. It does not establish Wageningen Green as a universal standard name or confirm the current identity. The article preserves that distinction and keeps this qualified finding outside the naturally W-named digital atlas.

Windows Blue has an exact survey source

The primary xkcd dataset explicitly contains windows blue #3778BF. That resolves the original number more precisely than calling it an unidentified UI approximation. Retain the survey attribution and lowercase label. It is not a Microsoft-wide or timeless Windows brand specification. [\[13, 32\]](#)

White, pale colors and the twelve shade families

Judge the actual patch

A pale coffee- or chocolate-named patch can read as off-white. A dark warm patch may read as Brown even when its saturation is modest. The source name stays unchanged; the editorial family is assigned independently after visual inspection on a neutral surround.

Boundaries are editorial

White versus pale Yellow, Pink or Blue is a judgment about the patch’s appearance in this navigation scheme. The same is true of Brown versus Gray and Green versus Blue in muted teals. No single hue threshold, maximum RGB channel or name-derived rule settles every case.

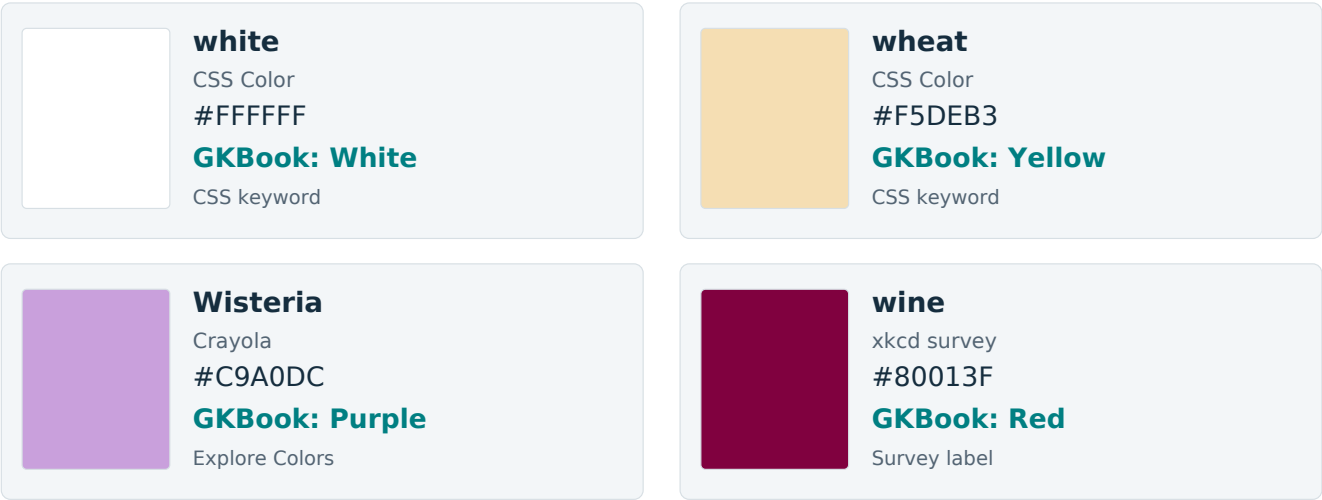

Consistency is checkable

Every distinct admitted RGB triplet is inspected, then reviewed in its final family montage. Identical triplets receive identical families within this edition. Original family labels and final decisions remain in the audit data. All original legacy patches are reviewed as well, even when their name/value claims remain unverified.

GKBOOK / W-COLORS / FIGURE 3

Read the swatch, keep the name

Source names and editorial families answer different questions

Original GKBook graphic • Research checked October 16, 2026

Figure 3. Read the swatch, keep the name The family is a reviewed navigation judgment. Original source names and numerical values are preserved.

Weld, woad and white lead are material contexts

Weld

Weld dye comes from *Reseda luteola* and contains luteolin as its principal coloring matter. Its appearance depends on preparation and mordant; the conservation reference describes yellow, gold and green results. A single hex cannot stand for every dyed material. The historical Weld headword is recorded separately from this material discussion. [\[22, 27\]](#)

Woad

Woad is a dye context associated with *Isatis tinctoria*. Its history and material chemistry do not prescribe one encoded RGB triplet. A modern paint named Woad can legitimately have a documented maker preview, but that preview is not the digital definition of the plant or every historical textile dyed with it. [\[28\]](#)

White lead

White lead is a related name for the pigment commonly called lead white, principally basic lead carbonate. This is a substance identity, not a synonym for CSS white. Other white pigments have different compositions and optical properties. The article discusses the material without inventing an exact RGB value or making a blanket safety claim. [\[29\]](#)

Historical W names and source discrepancies

A dictionary of regions, not RGB recipes

The historical register contains 121 direct W headwords and 150 source assignments from printed pages 153-155 of NBS SP 440. A numbered ISCC-NBS category describes a color region. It is not a unique hex value. Earlier authors and systems remain distinct in the expanded descriptions. [22]

Preserve spelling and indexing structure

Wedgewood Blue and Wedgwood Blue are separately assigned historical forms. Winter Green and Wintergreen also have distinct source contexts. Brackets in Wistaria [Blue] distinguish that entry from unbracketed Wistaria Blue. Inverted cross-reference-only entries and modifier-first names beginning with another letter are not counted again.

Do not hide a printing inconsistency

The Winter White row visibly prints the abbreviation p.yPk with serial 3. The abbreviation indicates pale yellowish pink, which corresponds to category 31, while category 3 is deep pink. The reverse dictionary on printed page 42 (PDF page 78) explicitly lists Winter White under category 31. The register therefore uses 31 with a correction note preserving the printed serial 3 and both locators. No RGB is inferred. [22]

Pantone owner previews and dealer conflicts

Codes and systems stay attached

TCX and TPG are separate Pantone Fashion, Home + Interiors contexts. A shared name does not justify transferring one system's number to another. Regional owner pages expose explicit name, code, hex and RGB fields. X-Rite China's navigation link corroborates the identity of the regional Pantone domain. [25, 26]

Independent owner evidence resolves a publication choice

All 120 discovered W dealer name/code rows were checked against regional owner pages. The 53 dealer rows with contradictory RGB and hex remain held outside the atlas. Every held code has a separately verified owner preview. The 67 internally consistent dealer rows remain labeled as dealer approximations, alongside the distinct owner records. [12, 25]

A numerical check has limits

The 120 owner records have agreeing names, codes and RGB/hex fields. They remain on-screen simulations, not physical standards. Placeholder zero CMYK fields were not treated as usable conversions. The original contradictory dealer fields are preserved so a future editor can see exactly what was resolved and what was not.

Reading hexadecimal and RGB

One triplet, two notations

In six-digit hexadecimal notation, the first pair is red, the second green and the third blue. For CSS wheat, F5 is 245, DE is 222 and B3 is 179. Thus #F5DEB3 and RGB (245,222,179) encode exactly the same eight-bit channels. [17, 36]

These numbers are not pigment percentages

Encoded channels are interpreted as sRGB for the previews and calculations in this edition. They are not percentages of paint, a reflectance spectrum or a device-independent CMYK recipe. Physical output depends on materials, lighting, viewing conditions and color management. [19]

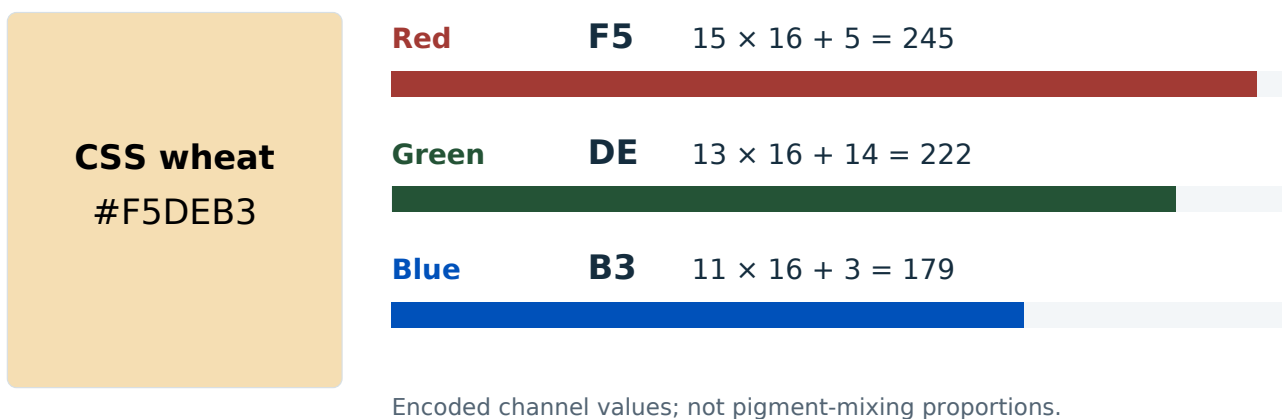

Verification follows the stated field

When both RGB and hex are supplied, their exact agreement is checked. When the source supplies only an explicit named CSS hex or RGB field, the other notation is calculated exactly. A photograph or screenshot is never used as a substitute for missing numerical evidence.

GKBOOK / W-COLORS / FIGURE 2

Reading #F5DEB3

CSS wheat • RGB (245, 222, 179)

Original GKBook graphic • Research checked October 16, 2026

Figure 2. Reading #F5DEB3 Hexadecimal and decimal RGB are exact alternative notations. Previews are interpreted as sRGB for this edition.

Using W colors for accessible text

Contrast depends on the pair

The data calculate black and white text contrast against each opaque sRGB patch. WCAG's AA threshold is 4.5:1 for normal text and 3:1 for large text. Values are compared before rounding. A color's name or the maker's paint LRV does not replace this calculation. [19-21]

A worked pale-color example

The figure uses CSS wheat. Black text has much greater contrast against this pale background than white text. The calculation explains a foreground choice; it does not certify an entire interface. Small labels, interaction states and changes of background still need review.

Preserve information without color alone

The directory and atlas pair every patch with a name, identifier, source and numerical value. Pale chips have visible borders. Searchable text, captions and SVG text alternatives make the reference usable when color distinctions are difficult to perceive or images are unavailable.

GKBOOK / W-COLORS / FIGURE 4

Text contrast on CSS wheat

Opaque sRGB colors • Relative luminance $Y = 0.7491$

AA: at least 4.5:1 for normal text; 3:1 for large text.

White text also falls below 3:1. Compare unrounded values at any threshold.

Original GKBook graphic • Research checked October 16, 2026

Figure 4. Text contrast on CSS wheat The foreground/background pair determines contrast. These WCAG calculations do not certify an entire interface.

Research scope, dates and future updates

Bounded coverage

The consulted manufacturer inventories, standards, source datasets and historical pages are named in the source register. PPG discovery followed all 22 browse-all pages, covering 2,061 unique product URLs. Jotun coverage is one regional interior inventory with 989 returned rows and 972 unique identities because pagination overlaps. These are bounded evidence sets, not worldwide exhaustive lists. [6, 15]

Version evidence stays visible

Broad inventories reused from the same October 15-16, 2026 research cycle keep their original dates and hashes. W product pages were fetched separately. Older/current Sherwin-Williams values and any retrieval or numerical gaps are logged. A changed web preview does not prove that a physical paint was reformulated. [3, 34, 35]

Update the identity and the evidence together

A future revision should check the name, code, system, market, source date and exact numerical field before replacing a value. Preserve old evidence and unresolved claims. Treat a new primary source as a reason to refine the context, not as permission to overwrite unrelated same-name colors.

Source coverage and family guide

Source groups identify distinct evidence contexts, not a count of unrelated manufacturers. Dealer approximations, survey labels and dated issuer guides remain distinguishable. CSS contributes three W-initial keywords and X.Org contributes eleven distinct name/value identities. Counts below cover the admitted digital records.

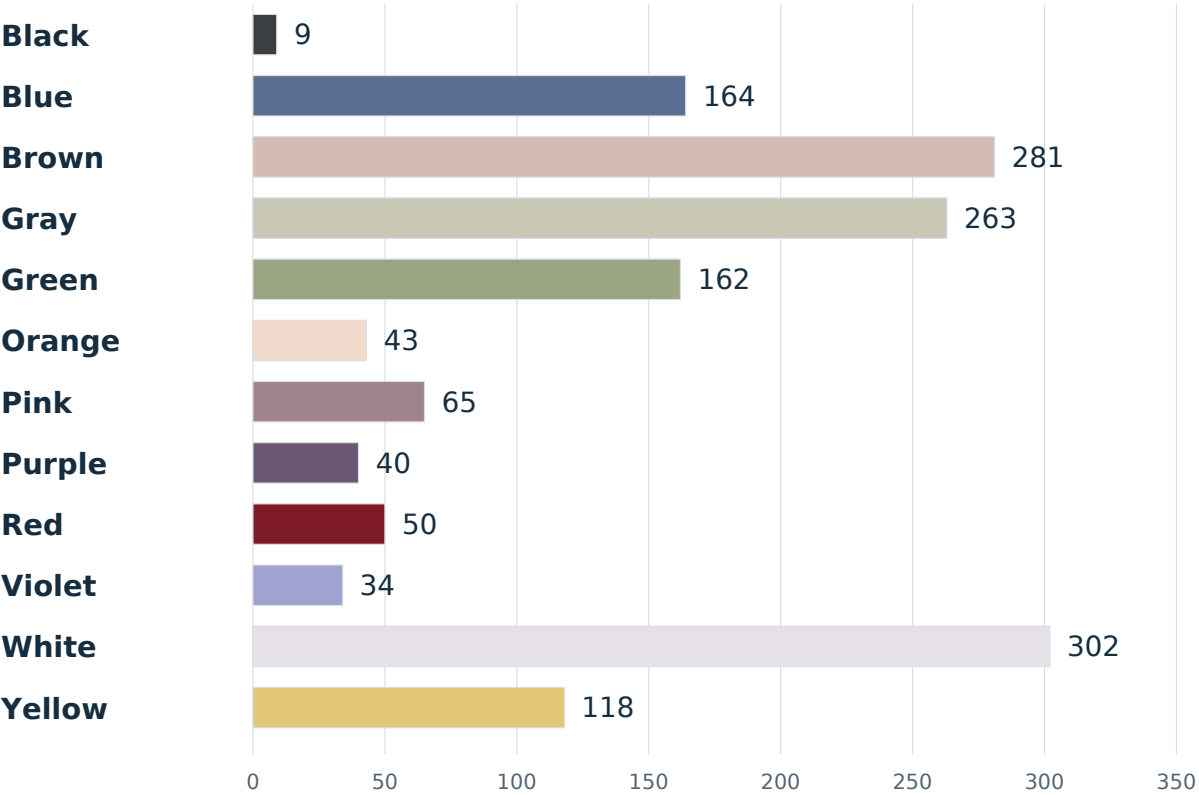

Source group	n	Consulted evidence
Behr	238	238 W-initial records. Source identity, code, exact numerical evidence and qualifiers retained. [1]
Dulux Australia	233	233 W-initial records. Source identity, code, exact numerical evidence and qualifiers retained. [9]

Distribution in this edition

GKBOOK / W-COLORS / FIGURE 5

The 12 editorial families

Records in this source-bounded edition • n = 1,531

Each admitted record is counted once. • Counts do not measure popularity or natural abundance.

Figure 5. The 12 editorial families The distribution reflects consulted catalogs, record boundaries, and GKBook’s final visual judgments. It is not a survey of color popularity.

These counts describe the inventories and editorial boundaries used here. They do not measure worldwide frequency, popularity, natural abundance, or scientific importance.

Family definitions

Family	n	Interpretation / atlas figure
Black	9	Very dark near-neutrals and selected tinted blacks. Figure 6.
Blue	164	Blues, blue-grays, cyan blues, and selected blue teals. Figure 7.
Brown	281	Earthy warm colors, tans, beiges, ochres, and selected taupes. Figure 8.
Gray	263	Near-neutrals with subdued warm, cool, green, or violet undertones. Figure 9.
Green	162	Greens, mints, olives, yellow-greens, and selected green teals. Figure 10.
Orange	43	Oranges, peaches, salmon-oranges, and selected warm ambers. Figure 11.
Pink	65	Pinks, blushes, roses, and selected coral or deep rose colors. Figure 12.
Purple	40	Comparatively red-leaning or balanced purples, mauves, and plums. Figure 13.
Red	50	Reds, crimsons, burgundies, and selected brick colors. Figure 14.
Violet	34	Comparatively blue-leaning purples and selected lavenders. Figure 15.
White	302	Very pale near-neutrals and selected tinted whites. Figure 16.
Yellow	118	Yellows, creams, golden colors, and selected yellow chartreuses. Figure 17.

Figures 6–17 span 58 labeled atlas sheets. Every one of the 1,531 digital records appears exactly once. Pale patches have borders; identifiers and numerical values accompany every patch.

Alphabetical digital directory

Family is GKBook’s visual judgment. Each hex/RGB pair is exactly equivalent. The evidence note preserves source categories, archive flags, LRVs, aliases, and limitations. No product code is invented when the consulted page omits it. Proper source spellings and regional names remain intact. Every admitted name begins naturally with W; accent-insensitive search preserves the original displayed spelling. Source systems and original names remain in the data.

Primary catalog numerical preview checked. Source LRV 61.13.						

Aliases and source versions

Seven X.Org case/spacing alias rows were consolidated. Original spellings remain searchable in the data. Different source contexts remain separate even when values coincide. Duplicate discovery URLs do not create additional identities. The alias target and original text are retained. [\[18\]](#)

The source-version file preserves 44 code-matched differences between the older Sherwin-Williams table and retained primary previews. Seventy-three general Sherwin-Williams records and the separate HGTV record have individually checked numerical pages. One older-table Well-Bred Brown context remains explicitly historical; current SW7027 is Hickory Smoke. Preview differences do not establish physical reformulation. [\[3, 34, 35\]](#) Nerolac separately publishes Wataer Lily #D6EBEA and Water Lily #EDE7E3 with code W-127. Both page observations are flagged; the code alone cannot establish one value. [\[11\]](#)

Historical W-color names

The 121 directly assigned W headwords below come from printed pages 153-155 (PDF pages 189-191) of NBS SP 440. The 150 source assignments remain distinct. Winter White also uses the reverse-dictionary evidence on printed page 42 to resolve a printed index discrepancy. Inverted cross-references and modifier-first forms are not counted again. Source-specific spellings, plate codes and same-as pointers are retained. No historical RGB value is invented. [\[22\]](#)

Key	Earlier source interpreted by NBS
A	American Association of Textile Chemists and Colorists / Society of Dyers and Colourists, Colour Index names.
F	Federal Specification TT-C-595 (1950), with agency abbreviations retained.
B	H. A. Dade, Color Terminology in Biology.
H	R. F. Wilson, Horticultural Colour Charts.
M	Maerz and Paul, A Dictionary of Color, first edition.
P	Plochere Color System.
R	Ridgway, Color Standards and Color Nomenclature.
S	William H. Beck, Postage-Stamp Color Names.
T	Taylor, Knoche, and Granville, Descriptive Color Names Dictionary.
TC	Textile Color Card Association: Standard Color Card of America and U.S. Army Color Card.
MUP-03	Commercial Standard CS147-47, molded urea plastics; sample 03.
MUP-02	Commercial Standard CS147-47, molded urea plastics; sample 02.
MUP-00	Commercial Standard CS147-47, molded urea plastics; sample 00.
PSP-00	Commercial Standard CS156-49, polystyrene plastics; sample 00.
RC	National Research Council, Rock-Color Chart.
SC	U.S. Department of Agriculture Soil Color Charts.

Each source assignment is expanded separately. Category regions are not unique RGB triplets. Same-as pointers and associations remain explicit. Earlier works are represented through NBS rather than independently reexamined.

Historical directory

Headword / ID	Keys / numbers	Documented meaning and qualification
Wad WH001	M: 186	M: grayish blue. Same as Woad. NBS printed pp. 153
Wafted Feather WH002	P: 231, 232	P: purplish white, light purplish gray. NBS printed pp. 153
Wald WH003	M: 101, 102	M: light greenish yellow, moderate greenish yellow. Same as Acacia. NBS printed pp. 153
Wallflower [Brown] WH004	M: 16, 43	M: dark red, moderate reddish brown. Same as Cuba; brackets retained. NBS printed pp. 153
Wall Green WH005	M: 160; R: 164	M: strong bluish green. R: moderate bluish green. NBS printed pp. 153
Walnut WH006	P: 57	P: light brown. NBS printed pp. 153
Walnut [Brown] WH007	M: 76	M: light yellowish brown. Associated name: Taffy; brackets retained. NBS printed pp. 153
Walnut Brown WH008	R: 43, 46	R: moderate reddish brown, grayish reddish brown. NBS printed pp. 153
Walnut Cream WH009	P: 73	P: pale orange yellow. NBS printed pp. 153
Wan Blue WH010	P: 189, 231	P: bluish white, purplish white. NBS printed pp. 154
Warbler Green WH011	M: 106; R: 106	M: light olive. R: light olive. M: same as Romantic Green. NBS printed pp. 154
Warm Blackish Brown WH012	R: 20, 23	R: dark grayish red, dark reddish gray. NBS printed pp. 154
Warm Buff WH013	R: 71, 73, 87	R: moderate orange yellow, pale orange yellow, moderate yellow. NBS printed pp. 154
Warm Gray (Eng 125) WH014	F: 90	F: grayish yellow. Federal identifier 3650. NBS printed pp. 154
Warm Gray (USA 125) WH015	F: 90	F: grayish yellow. Federal identifier 1750; associated name Highlight Buff (Y&D 22). NBS printed pp. 154

Headword / ID	Keys / numbers	Documented meaning and qualification
Warm Sepia WH016	M: 61; R: 61	M: grayish brown. R: grayish brown. M: same as Coconut. NBS printed pp. 154
Water Blue WH017	M: 164	M: moderate bluish green. Same as Bremen Blue. NBS printed pp. 154
Water-color WH018	M: 163	M: light bluish green. Same as Venice [Blue]. NBS printed pp. 154
Water Cress WH019	M: 120	M: moderate yellow green. Same as Cress Green. NBS printed pp. 154
Waterfall WH020	M: 164	M: moderate bluish green. NBS printed pp. 154
Water Fall WH021	P: 173	P: moderate greenish blue. NBS printed pp. 154
Water Green WH022	M: 105, 119, 121; P: 121; R: 121	M: grayish greenish yellow, light yellow green, pale yellow green. P: pale yellow green. R: pale yellow green. NBS printed pp. 154
Water Grey WH023	M: 112	M: light olive gray. NBS printed pp. 154
Waterloo WH024	M: 204	M: grayish purplish blue. NBS printed pp. 154
Watermelon WH025	M: 3, 15	M: deep pink, moderate red. NBS printed pp. 154
Water Sprite WH026	M: 135	M: light yellowish green. NBS printed pp. 154
Watteau WH027	M: 181; P: 172	M: light blue. P: light greenish blue. NBS printed pp. 154
Wau WH028	M: 101, 102	M: light greenish yellow, moderate greenish yellow. Same as Acacia. NBS printed pp. 154
Wax Brown WH029	M: 77	M: moderate yellowish brown. Same as Bronze. NBS printed pp. 154
Wax Color WH030	M: 104, 105	M: pale greenish yellow, grayish greenish yellow. Same as Wax White. NBS printed pp. 154

Headword / ID	Keys / numbers	Documented meaning and qualification
Waxen WH031	M: 104, 105	M: pale greenish yellow, grayish greenish yellow. Same as Wax White. NBS printed pp. 154
Wax Red WH032	M: 39	M: grayish reddish orange. Same as Copper. NBS printed pp. 154
Wax White WH033	M: 104, 105	M: pale greenish yellow, grayish greenish yellow. Associated names: Wax Color, Waxen. NBS printed pp. 154
Wax Yellow WH034	M: 87; R: 84	M: moderate yellow. R: strong yellow. NBS printed pp. 154
Weathered Oak WH035	M: 59	M: dark brown. Same as Leaf Mold. NBS printed pp. 154
Wedgewood Blue WH036	R: 180, 181, 198, 199	R: very light blue, light blue, very light purplish blue, light purplish blue. Spelling differs from separately assigned Wedgwood Blue. NBS printed pp. 154
Wedgwood Blue WH037	T: 185	T: pale blue. NBS printed pp. 154
Wedgwood Green WH038	T: 120, 121, 122	T: moderate yellow green, pale yellow green, grayish yellow green. NBS printed pp. 154
Weigelia WH039	M: 15	M: moderate red. Source spelling retained. NBS printed pp. 154
Weld WH040	M: 101, 102	M: light greenish yellow, moderate greenish yellow. Same as Acacia; this historical assignment is distinct from a material specification for weld dye. NBS printed pp. 154
Westminster WH041	M: 194, 205	M: vivid purplish blue, vivid violet. NBS printed pp. 154
West Point WH042	M: 192; TC: 186	M: dark bluish gray. TC: grayish blue. NBS printed pp. 154
Wheat WH043	M: 71, 73; T: 87, 89	M: moderate orange yellow, pale orange yellow. T: moderate yellow, pale yellow. T: same as Buff. These categories are not the CSS wheat triplet. NBS printed pp. 154
Whimsical WH044	P: 222	P: light purple. NBS printed pp. 154
Whippet WH045	M: 95	M: moderate olive brown. Associated name: Cocher. NBS printed pp. 154

Headword / ID	Keys / numbers	Documented meaning and qualification

Wrought Iron WH121	M: 266	M: dark gray. NBS printed pp. 155

Conflicting dealer evidence and owner resolutions

53 Pantone dealer rows have conflicting RGB/hex fields. The diagnostic calculation shows the hex equivalent of the printed RGB. A separately verified regional-owner page exists for every held code. Each owner preview is admitted under its own source identity; the contradictory dealer row remains outside the atlas. [\[12, 25, 26\]](#)

The data preserve the exact dealer and owner URLs and all original fields. The owner preview is a documented publication choice for that code and system, not a silent repair of the dealer table or a measured physical standard. The comparison file also covers all internally consistent dealer rows. [\[12, 25\]](#)

Supplementary contexts and scope gaps

Name / source	Evidence boundary
Walmart Blue / current True Blue / Walmart	Current owner specification is True Blue #0053E2, RGB (0,83,226), superseding both the supplied #007DC6 and audit suggestion #0071CE for the current context. True Blue is not renamed to force a W entry. [23, 24]
Walmart historical era colors / Supplied list	Four year-to-hex claims lack primary period-guide authentication. #030303 is black, but a label correction cannot authenticate its dates or origin. [33]
Wageningen Green / Wageningen UR / indexed historical guide	Indexed owner Colour Reference Card v2.0, September 2013 supports #34B233 / RGB (52,178,51). Direct file retrieval returned 404; current guide and exact composite name are unverified. [30]
Windows Blue / xkcd survey	Exact primary survey label windows blue #3778BF is admitted. This does not establish a Microsoft brand specification. [13]
White lead / MFA Boston CAMEO	Related name for lead white, a basic lead carbonate pigment. No universal material RGB is inferred. [29]
Weld / MFA Boston CAMEO	Natural dye from Reseda luteola; luteolin and mordant-dependent appearance. No universal digital value is established. [27]
Woad / MFA Boston CAMEO	Dye context associated with Isatis tinctoria; distinct from any modern maker preview. [28]
Whimsical Woods MTL128 / PPG	Named metallic product confirmed. No explicit numerical field was established; kept outside atlas. Source: https://www.ppgpaints.com/ppg-colors/whimsical-woods [6]
Well-Bred Brown / Sherwin-Williams / HGTV	Historical SW7027 #584C3D is retained with its older table. Current SW7027 is Hickory Smoke #564537. A separate HGSW2461 owner page retains Well-Bred Brown with #564537. Codes and contexts must stay separate. [3, 34]
White Smoke / whitesmoke / CSS and NBS	The audit mentions White Smoke, though it is absent from the supplied 46-row list. CSS whitesmoke #F5F5F5 is added as a sourced keyword. Historical Plochere White Smoke is a distinct category. [17, 22, 33]

Supplementary contexts, continued

Name / source	Evidence boundary
Winter White / NBS / Plochere	Alphabetical index prints p.yPk with serial 3; the descriptive abbreviation implies category 31. The reverse dictionary independently lists Winter White in category 31. Preserve the printed discrepancy with both locators, not a fabricated RGB. [22]

One discovered numerical gap remains: PPG Whimsical Woods MTL128 is a confirmed metallic name without an explicit numerical field. Ten trend/family/collection pages were excluded. An obsolete Dulux Wiggle endpoint resolves to an admitted product page. Well-Bred Brown is retained only in its documented historical SW and separate HGTV contexts; current SW7027 is Hickory Smoke. The data preserve these decisions. [3, 6, 9, 11, 34]

Reconciliation of the earlier W list

All 46 supplied rows are accounted for: 19 exact source-specific matches, one correction for the current Walmart owner context, one limited historical Wageningen corroboration, and 25 unverified legacy numerical claims. Twelve unverified claims have separately documented same-name contexts. Every original patch was reviewed; 9 family labels change. Visual assessment does not authenticate a numerical naming claim. [\[33\]](#)

Legacy entry / value	Evidence outcome	Resolution / matched IDs
WL001 / Wageningen Green / #34B233 / green	Indexed historical corroboration; retrieval limited	Retain the number only with the dated institutional and retrieval qualification. The owner-domain search index preserves the Wageningen UR Colour Reference Card v2.0, September 2013, with #34B233 and RGB (52,178,51). Direct PDF retrieval returned 404. Qualify this as indexed historical institutional evidence, not a fully rechecked current guide or an official composite color name. Original patch family: Green (retained). Evidence 1
WL002 / Walmart Blue / #007DC6 / blue	Correction for current owner context	Replace the current-brand claim with the checked owner specification. For the current owner context, replace this with True Blue #0053E2 / RGB (0,83,226), as printed in the current Walmart brand-center specification image. The audit suggestion #0071CE is also superseded for this context. True Blue belongs in contextual discussion rather than a fabricated W-prefixed source name. Original patch family: Blue (retained). Evidence 1
WL003 / Walmart Blue 19621964 / #0C5DA7 / blue	Legacy numerical claim unverified	No originating exact name/value match was established in the consulted inventories. Preserve the supplied fields in the audit and exclude this unsupported named value from the admitted atlas. No primary period guide authenticates the supplied 1962-1964 mapping. Keep the era and exact number unverified; do not infer a historical standard by sampling a reproduced logo. Original patch family: Blue (retained). Evidence 1
WL004 / Walmart Blue 19641981 / #030303 / black	Legacy numerical claim unverified	No originating exact name/value match was established in the consulted inventories. Preserve the supplied fields in the audit and exclude this unsupported named value from the admitted atlas. The patch is Black, but changing the name to Walmart Black would not authenticate its historical dates or numeric origin. Remove the confident Blue/era-standard claim. Original patch family: Black (retained). Evidence 1
WL005 / Walmart Blue 19811992 / #1D2CA0 / blue	Legacy numerical claim unverified	No originating exact name/value match was established in the consulted inventories. Preserve the supplied fields in the audit and exclude this unsupported named value from the admitted atlas. No primary period guide authenticates the supplied 1981-1992 mapping. Preserve it as an unresolved legacy claim. Original patch family: Blue (retained). Evidence 1
WL006 / Walmart Blue 19922008 / #2F39A8 / blue	Legacy numerical claim unverified	No originating exact name/value match was established in the consulted inventories. Preserve the supplied fields in the audit and exclude this unsupported named value from the admitted atlas. No primary period guide authenticates the supplied 1992-2008 mapping. Preserve it as an unresolved legacy claim. Original patch family: Blue (retained). Evidence 1

Legacy entry / value	Evidence outcome	Resolution / matched IDs
WL007 / Warm Black / #004242 / black	Legacy numerical claim unverified	No originating exact name/value match was established in the consulted inventories. Preserve the supplied fields in the audit and exclude this unsupported named value from the admitted atlas. The actual patch is strongly chromatic dark cyan/teal, assigned Blue under this edition's cyan/teal convention. The word Black does not establish its visual family or numerical authority. Original patch family: Blue (revised from Black).
WL008 / Warm Blue / #4B57DB / blue	Exact source-specific match	Retain #4B57DB only with its documented context: warm blue / xkcd survey. The xkcd match is an informal survey label, not a color standard. Original patch family: Blue (retained). Matched IDs: W0088 Recommended IDs: W0088 Evidence 1
WL009 / Warm Brown / #964E02 / brown	Exact source-specific match	Retain #964E02 only with its documented context: warm brown / xkcd survey. The xkcd match is an informal survey label, not a color standard. Original patch family: Brown (retained). Matched IDs: W0091 Recommended IDs: W0091 Evidence 1
WL010 / Warm Gray / #978A84 / gray	Exact source-specific match	Retain #978A84 only with its documented context: warm grey / xkcd survey. The xkcd match is an informal survey label, not a color standard. The exact xkcd label is warm grey, with British spelling. Use that spelling when attributing this number to the survey. Original patch family: Gray (retained). Matched IDs: W0113 Recommended IDs: W0113 Evidence 1
WL011 / Warm Pink / #FB5581 / pink	Exact source-specific match	Retain #FB5581 only with its documented context: warm pink / xkcd survey. The xkcd match is an informal survey label, not a color standard. Original patch family: Pink (retained). Matched IDs: W0137 Recommended IDs: W0137 Evidence 1
WL012 / Warm Purple / #952E8F / purple	Exact source-specific match	Retain #952E8F only with its documented context: warm purple / xkcd survey. The xkcd match is an informal survey label, not a color standard. Original patch family: Purple (retained). Matched IDs: W0140 Recommended IDs: W0140 Evidence 1
WL013 / Washed Out Green / #BCF5A6 / green	Exact source-specific match	Retain #BCF5A6 only with its documented context: washed out green / xkcd survey. The xkcd match is an informal survey label, not a color standard. Original patch family: Green (retained). Matched IDs: W0202 Recommended IDs: W0202 Evidence 1
WL014 / Water / #D4F1F9 / blue	Legacy numerical claim unverified	No originating exact name/value match was established in the consulted inventories. Preserve the supplied fields in the audit and exclude this unsupported named value from the admitted atlas. This is a pale blue-tinted white in the visual taxonomy. The family revision does not establish Water as a standardized name for this number. Original patch family: White (revised from Blue).
WL015 / Water Blue / #0E87CC / blue	Exact source-specific match	Retain #0E87CC only with its documented context: water blue / xkcd survey. The xkcd match is an informal survey label, not a color standard. Historical context: WH017; these categories supply no exact RGB. Original patch family: Blue (retained). Matched IDs: W0211 Recommended IDs: W0211 Evidence 1

Legacy entry / value	Evidence outcome	Resolution / matched IDs
WL016 / Watermelon 1 / #F05C85 / pink	Name found; legacy numerical claim unverified	Keep the supplied number unverified. Separate documented contexts include xkcd survey #FD4659 (W0264). These are not automatic replacements for an unspecified source. The trailing numeral is a legacy enumeration, not an authenticated system suffix. The primary xkcd watermelon is #FD4659, the other legacy variant. It does not authenticate #F05C85. Historical context: WH025; these categories supply no exact RGB. Original patch family: Pink (retained). Evidence 1
WL017 / Watermelon 2 / #FD4659 / pink	Exact source-specific match	Retain #FD4659 only with its documented context: watermelon / xkcd survey. The xkcd match is an informal survey label, not a color standard. The trailing numeral is a legacy enumeration, not an authenticated system suffix. Historical context: WH025; these categories supply no exact RGB. Original patch family: Pink (retained). Matched IDs: W0264 Recommended IDs: W0264 Evidence 1
WL018 / Watermelon Red / #BF4147 / red	Name found; legacy numerical claim unverified	Keep the supplied number unverified. Separate documented contexts include Benjamin Moore 2087-20 #C53D46 (W0273). These are not automatic replacements for an unspecified source. The consulted Benjamin Moore Watermelon Red preview uses a different number. Preserve its maker code and context rather than silently replacing an unspecified public-list value. Original patch family: Red (retained). Evidence 1
WL019 / Waterspout / #A4F4F9 / blue	Legacy numerical claim unverified	No originating exact name/value match was established in the consulted inventories. Preserve the supplied fields in the audit and exclude this unsupported named value from the admitted atlas. Retain Blue: this cyan remains visibly chromatic in the reviewed patch. The White/Blue boundary is editorial, not a factual numerical correction. Original patch family: Blue (retained).
WL020 / Weird Green / #3AE57F / green	Exact source-specific match	Retain #3AE57F only with its documented context: weird green / xkcd survey. The xkcd match is an informal survey label, not a color standard. Original patch family: Green (retained). Matched IDs: W0412 Recommended IDs: W0412 Evidence 1
WL021 / Weldon Blue / #7C98AB / blue	Legacy numerical claim unverified	No originating exact name/value match was established in the consulted inventories. Preserve the supplied fields in the audit and exclude this unsupported named value from the admitted atlas. An originating specification for this exact Weldon Blue name/value pair was not established. This evidence limit is not proof the name was invented. Original patch family: Blue (retained).
WL022 / Wenge / #645452 / gray	Name found; legacy numerical claim unverified	Keep the supplied number unverified. Separate documented contexts include Benjamin Moore AF-180 #3C2D2B (W0435). These are not automatic replacements for an unspecified source. The original patch reads as a warm grayish brown and is assigned Brown. The separately sourced Benjamin Moore Wenge is a different preview; it does not validate this number. Original patch family: Brown (revised from Gray). Evidence 1

Legacy entry / value	Evidence outcome	Resolution / matched IDs
WL023 / Wheat / #F5DEB3 / yellow	Exact source-specific match	Retain #F5DEB3 only with its documented context: wheat / CSS Color / CSS keyword; wheat / X.Org X11 / rgb 1.1.1. For the CSS context use the exact keyword wheat. The historical NBS Wheat categories are descriptive regions, not this numerical standard. Historical context: WH043; these categories supply no exact RGB. Original patch family: Yellow (retained). Matched IDs: W0494, W0498 Recommended IDs: W0494, W0498 Evidence 1 Evidence 2 Evidence 3
WL024 / White / #FFFFFF / white	Exact source-specific match	Retain #FFFFFF only with its documented context: white / CSS Color / CSS keyword; White / Crayola / Explore Colors; White / Walmart / Primary palette; white / X.Org X11 / rgb 1.1.1; white / xkcd survey. The xkcd match is an informal survey label, not a color standard. Use white (CSS) for the web-standard context. Delete the unsupported claim that white is the most universal color word. No replacement cross-language superlative is needed. Historical context: WH047; these categories supply no exact RGB. Original patch family: White (retained). Matched IDs: W0605, W0606, W0609, W0610, W0611 Recommended IDs: W0605, W0606, W0609, W0610, W0611 Evidence 1 Evidence 2 Evidence 3 Evidence 4 Evidence 5 Evidence 6
WL025 / White Chocolate / #EDE6D6 / brown	Name found; legacy numerical claim unverified	Keep the supplied number unverified. Separate documented contexts include Benjamin Moore OC-127 #F5F3E3 (W0647); Nerolac 2884 #DDD0C7 (W0648). These are not automatic replacements for an unspecified source. The actual patch reads as warm off-white; revise Brown to White. Same-name maker previews have their own different source values. Original patch family: White (revised from Brown). Evidence 1 Evidence 2
WL026 / White Coffee 1 / #E6E0D4 / brown	Legacy numerical claim unverified	No originating exact name/value match was established in the consulted inventories. Preserve the supplied fields in the audit and exclude this unsupported named value from the admitted atlas. The trailing numeral is a legacy enumeration, not an authenticated system suffix. Revise Brown to White for this warm off-white patch. Coffee is an association, not evidence for either a brown family or a numerical standard. Original patch family: White (revised from Brown).
WL027 / White Coffee 2 / #E6E2D3 / brown	Legacy numerical claim unverified	No originating exact name/value match was established in the consulted inventories. Preserve the supplied fields in the audit and exclude this unsupported named value from the admitted atlas. The trailing numeral is a legacy enumeration, not an authenticated system suffix. Revise Brown to White for this warm off-white patch. The legacy numeral is not an authenticated warm-variant or product code. Original patch family: White (revised from Brown).

Legacy entry / value	Evidence outcome	Resolution / matched IDs
WL028 / Wild Blue Yonder 1 / #7A89B8 / blue	Exact source-specific match	Retain #7A89B8 only with its documented context: Wild Blue Yonder / Crayola / Explore Colors. The trailing numeral is a legacy enumeration, not an authenticated system suffix. Relabel as Wild Blue Yonder (Crayola) in the checked web-preview context. Do not demote the owner value to an invented Deep variant. Original patch family: Blue (retained). Matched IDs: W0876 Recommended IDs: W0876 Evidence 1
WL029 / Wild Blue Yonder 2 / #A2ADD0 / blue	Name found; legacy numerical claim unverified	Keep the supplied number unverified. Separate documented contexts include Benjamin Moore CSP-620 #798E99 (W0875); Crayola Explore Colors #7A89B8 (W0876). These are not automatic replacements for an unspecified source. The trailing numeral is a legacy enumeration, not an authenticated system suffix. The consulted Crayola owner inventory gives #7A89B8, not #A2ADD0. Keep this supplied number unverified rather than identifying it as the current Crayola specification. Original patch family: Blue (retained). Evidence 1 Evidence 2 Evidence 3 Evidence 4
WL030 / Wild Orchid / #D470A2 / purple	Name found; legacy numerical claim unverified	Keep the supplied number unverified. Separate documented contexts include Benjamin Moore 2072-40 #957E99 (W0945); Pantone TCX / dealer 16-2120 TCX #D979A2 (W0946). These are not automatic replacements for an unspecified source. The supplied patch is Pink. Separate Pantone owner and dealer Wild Orchid previews have different values and retain their own codes; they do not authenticate this exact triplet. Historical context: WH064; these categories supply no exact RGB. Original patch family: Pink (revised from Purple). Evidence 1 Evidence 2 Evidence 3 Evidence 4
WL031 / Wild Strawberry 1 / #FF3399 / pink	Exact source-specific match	Retain #FF3399 only with its documented context: Wild Strawberry / Crayola / Explore Colors. The trailing numeral is a legacy enumeration, not an authenticated system suffix. Relabel as Wild Strawberry (Crayola) in the consulted owner web-preview context. Historical context: WH068; these categories supply no exact RGB. Original patch family: Pink (retained). Matched IDs: W0978 Recommended IDs: W0978 Evidence 1
WL032 / Wild Strawberry 2 / #FF43A4 / pink	Name found; legacy numerical claim unverified	Keep the supplied number unverified. Separate documented contexts include Crayola Explore Colors #FF3399 (W0978); PPG PPG1044-6 #A5647E (W0979). These are not automatic replacements for an unspecified source. The trailing numeral is a legacy enumeration, not an authenticated system suffix. The current consulted Crayola preview is #FF3399. A dated issuer source would be needed to authenticate #FF43A4 as a different Crayola version. Historical context: WH068; these categories supply no exact RGB. Original patch family: Pink (retained). Evidence 1 Evidence 2

Legacy entry / value	Evidence outcome	Resolution / matched IDs
WL033 / Wild Watermelon / #FD5B78 / pink	Legacy numerical claim unverified	No originating exact name/value match was established in the consulted inventories. Preserve the supplied fields in the audit and exclude this unsupported named value from the admitted atlas. No named numerical owner field for Wild Watermelon was established in the consulted Crayola inventory. Keep the number unverified; absence from that inventory does not prove the name was never used. Original patch family: Pink (retained). Evidence 1
WL034 / Willpower Orange / #FD5800 / orange	Legacy numerical claim unverified	No originating exact name/value match was established in the consulted inventories. Preserve the supplied fields in the audit and exclude this unsupported named value from the admitted atlas. The patch is Orange, but no originating named specification for Willpower Orange #FD5800 was established. Original patch family: Orange (retained).
WL035 / Windows Blue / #3778BF / blue	Exact source-specific match	Retain #3778BF only with its documented context: windows blue / xkcd survey. The xkcd match is an informal survey label, not a color standard. This is explicitly the xkcd survey label windows blue, not an authenticated universal Microsoft/Windows brand color. The survey attribution resolves the audit's vague UI-approximation explanation. Original patch family: Blue (retained). Matched IDs: W1085 Recommended IDs: W1085 Evidence 1
WL036 / Windsor Tan / #A75502 / brown	Name found; legacy numerical claim unverified	Keep the supplied number unverified. Separate documented contexts include Behr MQ2-26 #CABBA1 (W1101). These are not automatic replacements for an unspecified source. NBS attests Windsor Tan as a historical name/category; that does not establish #A75502. Keep Windsor spelling in that historical context. Historical context: WH076; these categories supply no exact RGB. Original patch family: Brown (retained). Evidence 1
WL037 / Wine 1 / #722F37 / red	Name found; legacy numerical claim unverified	Keep the supplied number unverified. Separate documented contexts include xkcd survey #80013F (W1131). These are not automatic replacements for an unspecified source. The trailing numeral is a legacy enumeration, not an authenticated system suffix. Historical context: WH077; these categories supply no exact RGB. Original patch family: Red (retained). Evidence 1
WL038 / Wine 2 / #80013F / purple	Exact source-specific match	Retain #80013F only with its documented context: wine / xkcd survey. The xkcd match is an informal survey label, not a color standard. The trailing numeral is a legacy enumeration, not an authenticated system suffix. The exact primary survey wine is a dark red-magenta patch, assigned Red here. Purple is a neighboring visual interpretation, not an alternative numerical authority. Historical context: WH077; these categories supply no exact RGB. Original patch family: Red (revised from Purple). Matched IDs: W1131 Recommended IDs: W1131 Evidence 1
WL039 / Wine Red 1 / #7B0323 / red	Exact source-specific match	Retain #7B0323 only with its documented context: wine red / xkcd survey. The xkcd match is an informal survey label, not a color standard. The trailing numeral is a legacy enumeration, not an authenticated system suffix. Historical context: WH081; these categories supply no exact RGB. Original patch family: Red (retained). Matched IDs: W1151 Recommended IDs: W1151 Evidence 1

Legacy entry / value	Evidence outcome	Resolution / matched IDs
WL040 / Wine Red 2 / #B11226 / red	Name found; legacy numerical claim unverified	Keep the supplied number unverified. Separate documented contexts include RAL RAL 3005 #561E27 (W1150); xkcd survey #7B0323 (W1151). These are not automatic replacements for an unspecified source. The trailing numeral is a legacy enumeration, not an authenticated system suffix. The primary survey wine red is #7B0323. Historical Wine Red categories do not authenticate this second supplied number. Historical context: WH081; these categories supply no exact RGB. Original patch family: Red (retained). Evidence 1 Evidence 2
WL041 / Winter Sky / #FF007C / pink	Name found; legacy numerical claim unverified	Keep the supplied number unverified. Separate documented contexts include Asian Paints 8314 #B1B8B4 (W1269); Benjamin Moore 2163-70 #F4EBDF (W1270). These are not automatic replacements for an unspecified source. The historical Winter Sky entry is a blue descriptive region, while modern maker previews vary. Neither establishes this hot pink legacy number. Historical context: WH089; these categories supply no exact RGB. Original patch family: Pink (retained). Evidence 1 Evidence 2 Evidence 3 Evidence 4 Evidence 5
WL042 / Winter Wizard / #A0E6FF / blue	Legacy numerical claim unverified	No originating exact name/value match was established in the consulted inventories. Preserve the supplied fields in the audit and exclude this unsupported named value from the admitted atlas. Retain Blue: this patch is visibly sky blue. It has more chroma than the Water tinted-white example, despite both being light. Original patch family: Blue (retained).
WL043 / Wintergreen / #20F986 / green	Exact source-specific match	Retain #20F986 only with its documented context: wintergreen / xkcd survey. The xkcd match is an informal survey label, not a color standard. Historical context: WH085, WH086; these categories supply no exact RGB. Original patch family: Green (retained). Matched IDs: W1218 Recommended IDs: W1218 Evidence 1
WL044 / Wintergreen Dream / #56887D / blue	Name found; legacy numerical claim unverified	Keep the supplied number unverified. Separate documented contexts include Behr M430-3 #B1CDC2 (W1219). These are not automatic replacements for an unspecified source. Revise Blue to Green for this muted green teal. The consulted Behr Wintergreen Dream preview, M430-3 #B1CDC2, is a different triplet; it does not validate this legacy number. Original patch family: Green (revised from Blue). Evidence 1
WL045 / Wisteria 1 / #A87DC2 / purple	Exact source-specific match	Retain #A87DC2 only with its documented context: wisteria / xkcd survey. The xkcd match is an informal survey label, not a color standard. The trailing numeral is a legacy enumeration, not an authenticated system suffix. Relabel as wisteria (xkcd survey); preserve the lowercase source label. Historical context: WH099; these categories supply no exact RGB. Original patch family: Purple (retained). Matched IDs: W1354 Recommended IDs: W1354 Evidence 1

Legacy entry / value	Evidence outcome	Resolution / matched IDs
WL046 / Wisteria 2 / #C9A0DC / purple	Exact source-specific match	Retain #C9A0DC only with its documented context: Wisteria / Crayola / Explore Colors. The trailing numeral is a legacy enumeration, not an authenticated system suffix. Relabel as Wisteria (Crayola) in the consulted owner web-preview context. Historical context: WH099; these categories supply no exact RGB. Original patch family: Purple (retained). Matched IDs: W1347 Recommended IDs: W1347 Evidence 1

Glossary

Term	Meaning
Digital preview	A source-published screen representation, interpreted here as sRGB.
Hex triplet	Six hexadecimal digits encoding red, green and blue bytes.
Source-specific identity	A name together with its issuer, code, system or version and numerical evidence.
Source family	A maker or dataset category, kept separate from the editorial judgment.
Editorial family	One of twelve broad visual navigation categories in this edition.
ISCC-NBS category	A numbered descriptive region; not a unique RGB triplet.
TCX / TPG	Separate Pantone material-system contexts whose suffixes remain part of the identity.
LRV	A source-supplied light reflectance value; not the calculated relative luminance of a screen patch.
Relative luminance	A quantity calculated from linearized sRGB channels for contrast assessment.
Held record	A row whose numerical evidence conflicts or is insufficient for the admitted atlas.
Alias	A documented alternative label for the same identified source record.
Indexed historical evidence	Retrievable search-index content from a dated source whose original file could not be fetched in this review.

Frequently asked questions

Which W names are CSS keywords?

Wheat (#F5DEB3), white (#FFFFFF) and whitesmoke (#F5F5F5). The last is one word in CSS. [17, 36]

What is the current Walmart blue in this research?

The checked brand-center specification is True Blue #0053E2, RGB (0,83,226). The audit's proposed #0071CE is not the current value printed there. Use the owner name and retrieval date. [23, 24]

Which Wild Blue Yonder value is supported by Crayola?

The consulted owner preview gives #7A89B8. The legacy #A2ADD0 variant lacks matching owner evidence in this review and remains unverified. [16]

Is Windows Blue an official Windows standard?

The supplied #3778BF matches the exact xkcd survey label windows blue. This authenticates a survey context, not a universal Microsoft specification. [13]

Must every white-named paint be in the White family?

No. Names and visual categories answer different questions. The family comes from the actual patch; the original name remains unchanged.

Why can one W name have several hex values?

Different issuers, systems and versions can use the same name. Preserve the context before comparing or correcting their numbers.

Do historical names have exact modern RGB values?

Not from these NBS category assignments alone. The historical register preserves names, categories and earlier-source distinctions without inventing digital precision. [22]

Does a verified preview guarantee a physical match?

No. Verification establishes the documented name and numerical field. The physical material, finish, illumination and reproduction process remain separate considerations. [19, 25]
